

CORE ATTRIBUTES

SKU	31-3007
Name	Workfloor Cross Connector

MARKETING

Features & Benefits	• The cross connector is designed to join multiple workfloors in a cross configuration, enabling flexible containment layouts • It allows 2-drum and 4-drum workfloors to be securely connected, supporting more complex storage or handling arrangements • The connector clips on easily without tools, reducing installation time and simplifying layout changes • By mechanically linking adjacent workfloors, it helps maintain continuous secondary containment across intersecting platforms • The design prevents gaps between units, reducing the risk of liquid bypass during spills or leaks • It supports modular system expansion, allowing containment areas to be extended or reconfigured as operational needs change • User manual available on request to support correct installation and system configuration
