58"x80' Railroad Center Spilfyter Mat

Rail Mat is constructed from three layers that are bonded together. The top layer is a black or dark-grey UV-stabilized needle punch and the core is blue, Oil only meltblown polypropylene. The bottom layer is a heavy clear impervious plastic that prevents oil spills from leaking through to the ground. Rail Mat is primarily designed to protect railway yards or transport facilities whilst maintenance work is being carried out. It is also suitable for any heavy industrial application such as oil rigs or military maintenance facilities.

FEATURES & BENEFITS

- Three-layer construction provides for the strongest, most durable oil-only sorbent that we offer. The three layers are comprised of a heavy duty needle punch top layer for rapid fluid intake, a highly absorbent oil only meltblown core for fluid absorbency, and an impermeable poly-backing bottom layer to keep harmful fluids from penetrating through.
- Will not fall apart even when subjected to heavy saturation and/or foot traffic over time.
- Fits inside standard railroad tracks.
- Poly-backing prevents liquids from leaking through the sorbent
- Designed specifically to absorb oils/fuels, not water, during railyard maintenance
- Additional uses include under transformers and other applications where durability is a concern and absorbed liquids cannot leach through to the surface beneath.

KEY SPECIFICATIONS

Specification	Value
Product Type	Railroad Mat
Dimensions	58" x 960"
Length	960 in
Width	58 in
Absorbency Type	Oil Only
Absorbency	74 gal
Liquids Absorbed	Oils and petroleum-based liquids
Color	Blue
Bonding	Dimple bonded
Material	Three-Ply Needlepunch, Meltblown Polypropylene, Poly
Package Count	1

Specification	Value
Packaging Type	Bag
Cases / Layer	9
Layers / Pallet	1
Pallet Count	9
Ship Class	175
Tariff Code	5603.94.0000
Shipping Length	17 in
Shipping Width	17 in
Shipping Height	58 in
Shipping Weight	45.4 lbs
