

DESIGNING DYNAMIC CAREER & TECHNICAL EDUCATION SPACES

Gratnells

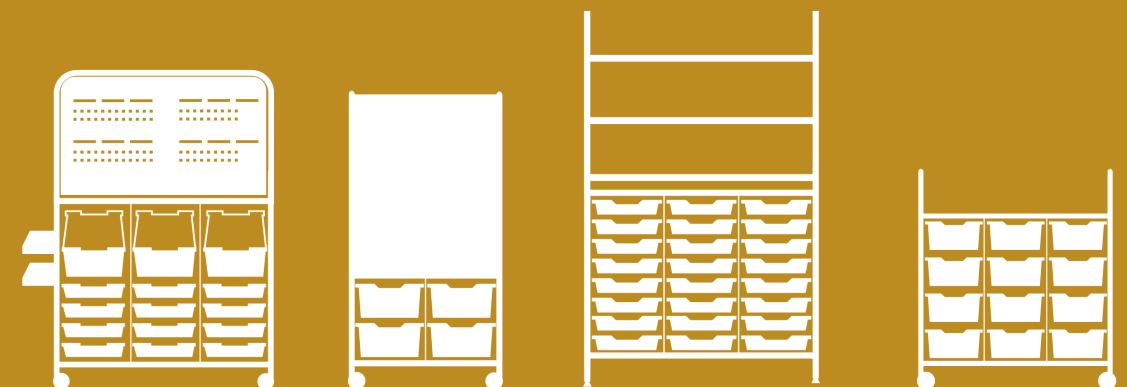

Our shape,
our trademark™

The job market is shifting. Automation, artificial intelligence, and changing industry demands mean that many of today's students will hold jobs that don't even exist yet.

CTE programs thrive on creativity and problem-solving. Spaces designed for hands-on making, prototyping, and testing encourage students to think critically and refine their ideas.

For Career and Technical Education programs to be effective, their learning spaces must be designed for flexibility, organization, and efficiency. A well-planned environment supports both structured instruction and hands-on experimentation.

MANUFACTURING

Callero MakerSpace

The Gratnells MakerSpace Cart has inserts, hooks and mini-bins for equipment. It is ideal for storing small components within easy reach, whilst the trays can be used to store larger components. It helps with design thinking, prototyping, and interdisciplinary projects.

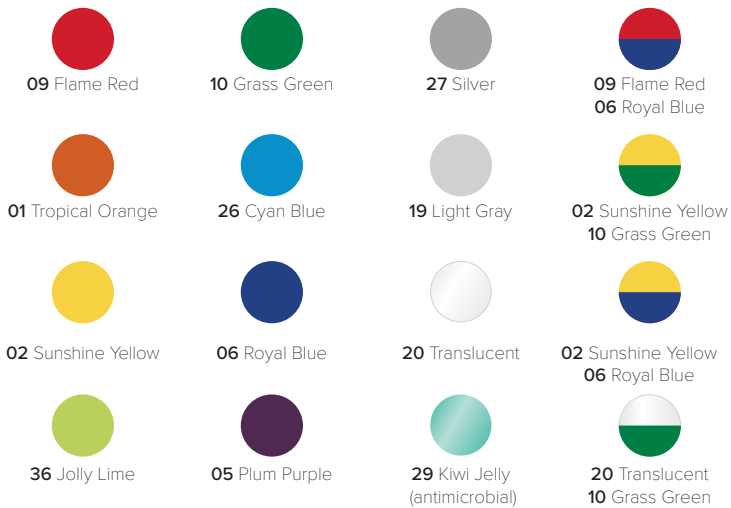

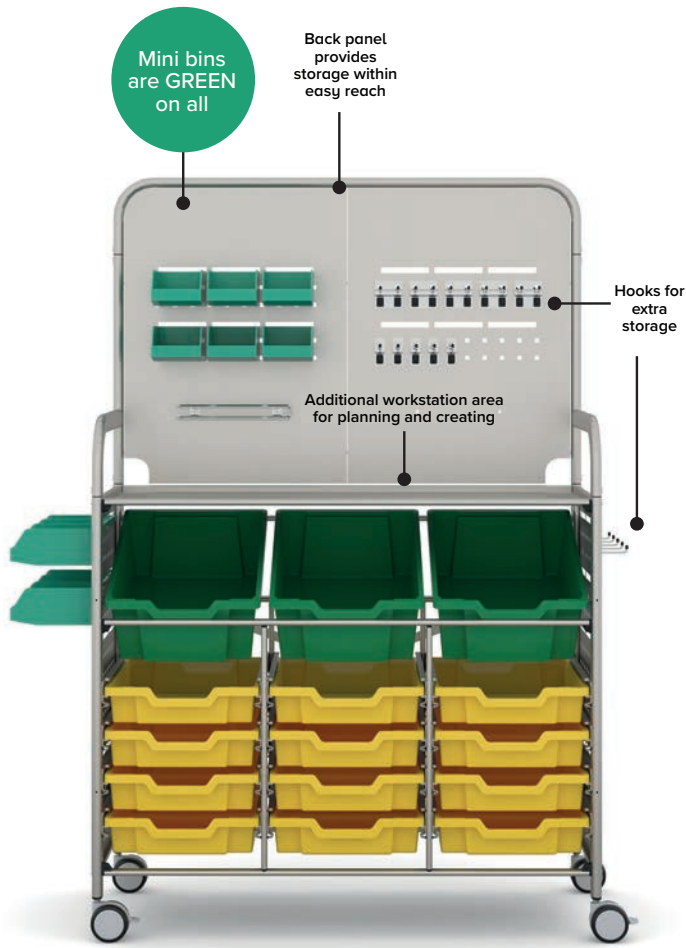

Product code	MST01
Dimensions	H61.8 x W41.9 x D17.9in
Product weight	99.9lb
Capacity frame/tray	551lb/11lb

COMPLETE WITH
3 Deep Trays
12 Shallow Trays
12 green mini bins
1 roll holder
5 single hooks
5 double hooks

Material frame/tray	Steel/polypropylene
Assembly	Self assembly

• Not available in antimicrobial option

Callero MakerHub

In CTE, teamwork is essential. Learning spaces should be designed to encourage group work, communication, and hands-on collaboration, so set up zones within the classroom for different types of work—one for quiet individual tasks, another for group collaboration, and a third for hands-on experimentation.

The MakerHub can play a role in supporting the teaching and learning in this environment with its double-sided whiteboards and deep trays to keep tools and materials accessible.
