Gratnells Trolley for LEGO® Education Computer Science & AI kits

Also compatible with LEGO® Education Science kits.

Key Features

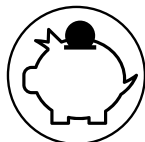

- ✓ **Mobile storage for LEGO® kits**
Transition complete kits directly to the teaching space for flexible use across classrooms.
- ✓ **Organised complete class kits**
Keeps kits sorted, reduces lost parts and improves readiness between lessons.
- ✓ **Accessible student-friendly layout**
Enables students to collect and return resources independently.
- ✓ **Protects high-value LEGO® Education kits**
The trolley is not just storage. It helps manage and safeguard a substantial investment.
- ✓ **Easy movement and storage**
Designed for quick transitions and efficient use of teaching spaces.

Durable metal construction for long-term school use

Easy to move between classrooms for shared use

More affordable than specialist alternatives

Built for 6–8 kits (expandable with pockets)

Designed specifically for LEGO® Education kit sizes*

One System. Whole School Impact.

Gratnells brings order to the chaos of creativity, giving every LEGO® brick, bot and bright idea a place to belong.

100%

of teachers said students were more likely to meet lesson objectives when resources were organised and ready.

80%

of students stayed more focused during lessons when practical work started quickly.

100%

of teachers saw increased creativity when materials were easy to access.

93%

of lessons met “most to almost all” diverse learner needs when every student had what they needed, right when they needed it.

Benefits For Your School

Faster lesson starts

Resources arrive ready to use, not hidden away in cupboards.

Reduced teacher set-up

Less sorting and transporting; more time focused on teaching and interacting with students.

Better organisation

Kits stay complete and ready for repeated use across classes.

Calmer clear-up

Pupils know exactly where kits and parts belong.

Supports inclusive learning

Easy distribution ensures every student has what they need to take part.

More value from each kit

When resources are simple to manage, teachers use LEGO® Education kits more often, with more confidence.

Designed for how schools actually use LEGO® kits

Built around *real* LEGO® kit sizes, accessories and classroom routines.

Keeps high-engagement learning resources ready for every lesson.

Kits stay visible to encourage regular use of investment.

*Designed specifically for LEGO® Education Computer Science & AI kits and LEGO® Education Science kits

“Where have the motors and sensors gone this time?”

Colour sensors, motors, cables and connection cards stay sorted, protected and exactly where teachers expect them.

“I can’t keep carrying these heavy boxes between rooms.”

One trolley moves a full class set safely across the school. No lifting. No stress.

“Clear-up takes forever and the next class is already waiting.”

Fixed places for every part mean pupils return items independently. Clear-up becomes quick, calm and consistent.

Available exclusively through Gratnells resellers.

Ideal for Science, STEAM and AI teaching across the whole school.
