

With CrestWater Cedar Shake, you can enjoy **all the beauty of real cedar shake**, without wood worries.

Why Choose CrestWater Cedar Shake?

- ✓ Split shake offers a deep textured appearance revealing random grooves and grain that give the look of traditional hand-split cedar.
- ✓ Depth creates contrast between light and shadow to heighten visual appeal

With a Class 1A fire rating, which is highest in the siding industry, you can depend on CrestWater Cedar Shake coast to coast, including areas prone to brush fires.

CrestWater Cedar Shake's sustainable single course panels hide overlaps, and generate less scrap than other siding. Its rugged construction endures where wood fails – and provides a fresh look over time, in spite of extreme temperature changes. Won't rot, warp or split.

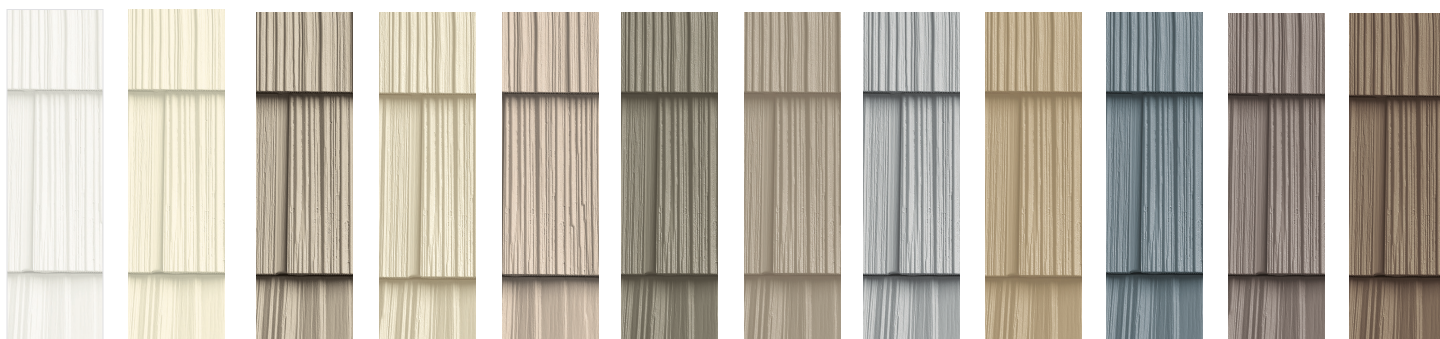

Choose CrestWater Cedar Shake
for Superior Aesthetics.
