ISAI-T26

Break language barriers instantly.

Isermō processes individual microphone inputs into text and translates any language in real time, displayed locally for maximum privacy and cost effectiveness.

No cloud needed, localized AI built on the leading professional transcription system for businesses, conferences, meetings interviews. 100+ languages, real time AI transcription, and unlimited use.

Everything runs locally on your infrastructure, and no data leaves your premises for maximum privacy and security. The Isermō enhances today's public meetings with live transcription, real-time translation, and permanent archiving.

ISERMO is designed to support ADA Title II effective communication, public meeting accessibility, multilingual language access, and local/ on premise captioning and translation workflows. ISERMO provides real time captions, translation, public display modes, session records, and operator controls that can help agencies meet accessibility and language access obligations. Final legal compliance depends on the customer's deployment, policies, requested accommodations, accuracy requirements, records practices, and jurisdiction specific legal review.
