

# Personal Finance Foundations™ Classroom Kit (Grades K–5)

## STEAM-PFF

Build essential life skills early with the Personal Finance Foundations™ Classroom Kit, a comprehensive, hands-on program designed for full-class participation while introducing students in grades K–5 to real-world financial concepts through interactive learning.

Unlike traditional worksheet-based approaches, this program emphasizes decision-making, discussion, and critical thinking. Students engage with laminated scenario cards that explore key financial topics. The included play coins and bills bring learning to life by allowing students to simulate real-world financial decisions in a tactile, engaging way.

The teacher guide with ready-to-use lesson plans ensures easy implementation, with structured activities that require minimal preparation. Designed for classroom and small group collaboration, the materials are reusable and ideal for classroom, after-school, or enrichment settings.

With Personal Finance Foundations™, students don't just learn about money—they learn how to think about it.

### Flash Cards Sections:

- What Is Money? • Earning Money
- Spending & Choices • Savings & Goals
- Needs vs. Goals

39 states now require personal finance coursework for graduation!
