

Smart-Trek™ Deluxe Stereo Headset

Native USB-C with Integrated USB-A Dongle

Built for Today's Classrooms, Ready for Tomorrow's Tech

ST2BKUC

deluxe headsets

The Smart-Trek™ Deluxe Stereo Headset is a USB-C-native audio solution featuring an attached USB-A dongle, delivering seamless compatibility across today's USB-C devices while maintaining support for legacy USB-A systems.

By supporting both connection types in a single headset, schools and organizations can simplify purchasing and deployment across mixed device environments without the need for separate adapters or multiple headset models.

Designed for flexibility in modern classrooms, labs, and media centers, this dual-interface headset works effortlessly with PCs, Macs, Chromebooks, and most gaming systems. The integrated USB-A dongle remains permanently attached, helping reduce accessory loss, replacement needs, and classroom downtime.

Built to withstand the demands of the K-12 environment, the Smart-Trek™ Deluxe Headset combines a sleek, professional design with rugged construction engineered for long-term use. Its durable build helps minimize breakage and replacement, supporting reliable performance year-after-year.

The Smart-Trek™ series is engineered for comfort and longevity, making it ideal for extended daily use. Features include an easily adjustable headband to fit students of all ages; high-quality, supple-soft leatherette ear cushions that are easy to clean, durable, and provide excellent noise isolation; and a flexible, noise-canceling, steel-reinforced gooseneck microphone for clear voice capture.

Completing the design is HamiltonBuhl's exclusive Dura-Cord™—a chew-, kink-, and knot-resistant, PVC-jacketed braided nylon cord built to stand up to daily classroom use.
