Spoken (Caption) Languages

Translation only

Americas

Europe

Middle East

Asia & Pacific

Africa

Overview

Notes

How to Read This Page

Enter the **Code** exactly as shown when you add a language on the Languages tab. Codes are standard BCP-47 tags.

Column	Meaning
Alpha	The spoken language can be captioned by the Alpha engine (fast, 25 European languages).
Delta3	The spoken language can be captioned by the Delta3 engine (global, 30 languages, automatic language detection).
Translate	The language can be a translation target for Omega.
Listen	Lambda can read captions aloud in this language on audience phones.

Note: Spoken vs. translated

A language can be **spoken** (captioned) only if Alpha or Delta3 supports it. Every language on this page can be used as a **translation** language. When both engines support a language, the appliance picks the best one automatically according to the ASR Engines setting.

Spoken (Caption) Languages

These 40 languages can be spoken into a microphone and captioned.

Code	Language	Native name	Alpha	Delta3	Translate	Listen
ar	Arabic	العربية	—	✓	✓	—

so	Somali	Af Soomaali
st	Southern Sotho	Sesotho
sw	Swahili	Kiswahili
xh	Xhosa	isiXhosa
yo	Yoruba	Yorùbá
zu	Zulu	isiZulu

Notes

- Omega covers several hundred languages. The table lists the ones tested on the appliance. Ask ISERMO support before you promise a language that is not listed.
- Translation quality depends on the language pair. Test rare pairs before an event.
- Listen (Lambda) voices are available only for the languages marked in the Listen column. Other languages show as unavailable on the audience page.
