

1 Unbox

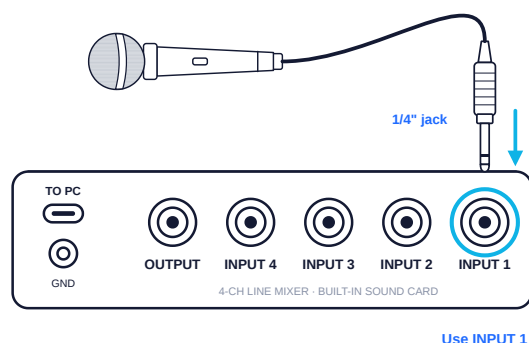

Remove the **Isermo unit**, **audio breakout box** and **microphone** from the carton. Keep the QR setup card for Step 5.

2 Connect the breakout box

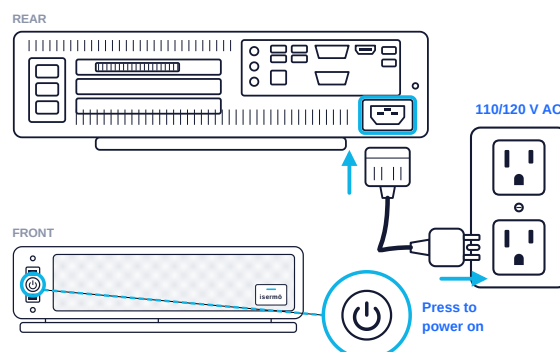

Connect the breakout box's **USB (TO PC)** port to a **USB port** on the Isermo unit.

3 Connect the microphone

Plug the included microphone's **1/4" jack** into **INPUT 1** on the breakout box.

4 Power on

Plug the Isermo system into a standard **110/120 V AC outlet**, then press the **power button** on the front.

5 Connect your phone

Scan the QR code provided with your Isermo using your smartphone. Join the Isermo Wi-Fi network using the **temporary SSID and password**.

✓ You're ready

WHAT YOU'LL NEED

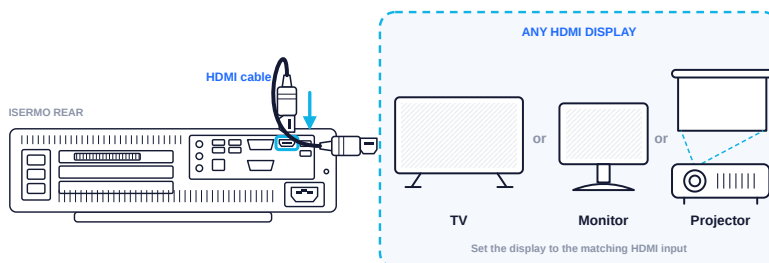

- A smartphone with a camera and Wi-Fi
- A standard 110/120 V AC wall outlet
- The QR card that came with your Isermo

GOOD TO KNOW

- INPUTS 2–4: extra mics or sound system (Step 9).
- OUTPUT connects headphones or an amplifier.
- Keep the vents on the Isermo clear.

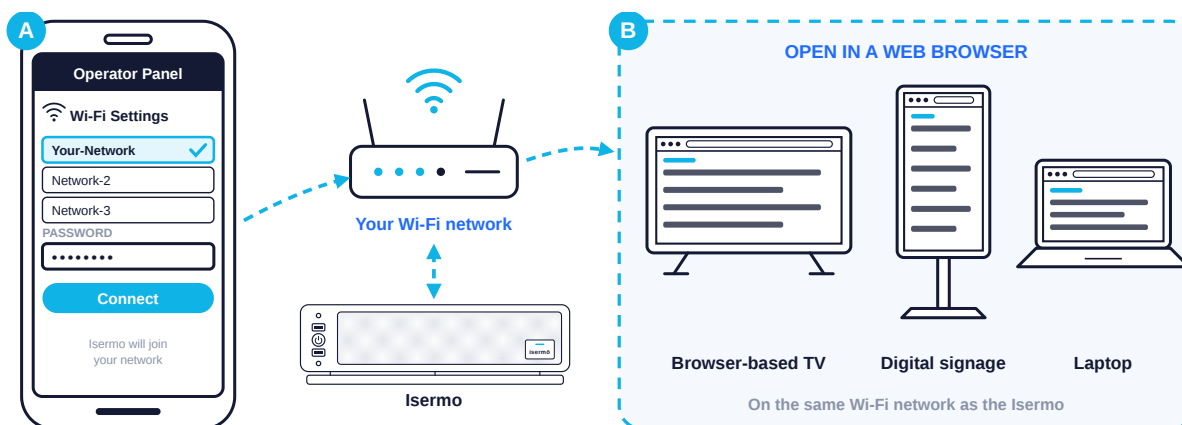

Every Voice. Every Language. Every Meeting.

6 Connect a display (HDMI)

Connect an HDMI cable from the **HDMI port on the rear** of the Isermo to a **TV, monitor or projector**. Switch the display to its HDMI input.

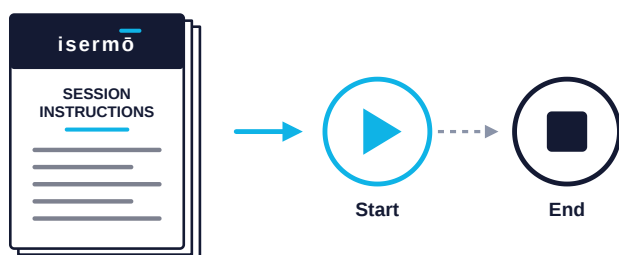

7 Set up Wi-Fi & connect browser displays

A When your phone is connected to the Isermo (Step 5), open the **operator panel**, choose your **Wi-Fi network**, enter the password and tap **Connect**.

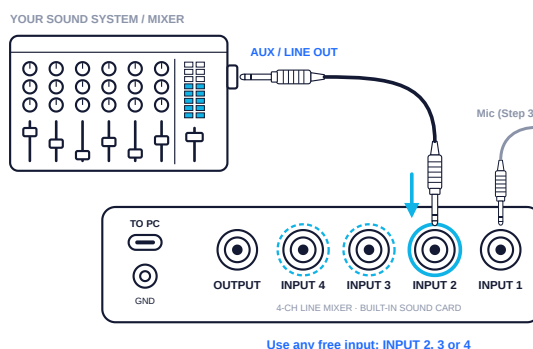

B Connect **browser-based TVs**, **digital signage** and/or **laptops** to the same network and open the Isermo display in their **web browser**.

8 Start & end a session

See the separate **Session Instructions** for how to **start** and **end** an Isermo session.

9 Add sound-system audio OPTIONAL

Connect an output (e.g. **AUX** or **LINE OUT**) from your sound system to a free **1/4" input** on the breakout box, using a 1/4" cable.
