

GENERAL SURVEY NOTES:

Original pre-construction topographic information shown was taken from a photogrammetric data provided by Continental Mapping Consultants as flown April, 2010 including contours on ground surfaces.

Original pre-construction contours within ponds were determined by bottom of pond elevations established by the surveyor, and supplemented with surveys provided by Lamac Engineering in April 2014.

As-built contours were taken from a combination of photogrammetric data flown on August 9, 2016 and ground survey on August 29, 2016.

Boundary information was taken from information provided to the surveyor by Ameren from a survey prepared February 1984 shown on sheet K-547.

The adopted coordinate system used for this survey was taken from the above mentioned survey of 1984.

The benchmark used was taken from the above mentioned survey of 1984 located near the main power plant shown as elevation 454.14'.
