The above referenced project included the installation of a radio communications system designed to provide public safety radio signal coverage as detailed in the submitted plans.

This letter shall CERTIFY that the above captioned system was installed in accordance with the approved plans and meets all the performance requirements of the International Fire Code as adopted by the State of Georgia and Cobb County.

Attached to this certification is a copy of the signal level measurements that were completed as part of the final acceptance testing. Note that all critical areas as defined in NFPA 72 SHALL BE COVERED WITH A MINIMUM OF -95dBm.

As an authorized representative of _________________________________
I certify that the referenced public safety radio communication system was installed in accordance with the approved plans, specifications and Federal Communications Commission Rules and Regulations. I further certify that the system will not create harmful or annoying interference to the Cobb County Public Safety Radio system or its users.

OWNERS ACKNOWLEDGEMENT:

I, ________________________________ as an authorized representative of the property owner acknowledge that annual maintenance and re-certification of the Emergency Radio Communication System is required by the International Fire Code as adopted by the State of Georgia. I further acknowledge that the installed system will be maintained in an operational condition and will not cause interference to any public safety communications system(s).
