

NATURAL FEATURES:

The Price Property includes approximately 1/2 mile of Allatoona Creek. This area would be within the future Allatoona Creek Greenway.

NATURAL FEATURES:

Natural outcroppings are found on the property and would be incorporated along the natural trails.

AMENITIES

Connectivity on both sides of Allatoona Creek is recommended by a pedestrian bridge in at least one location. The pedestrian bridge would offer a safe crossing that connects the east and west sides of the property.

PICNIC /ACTIVITY AREA

This area is located adjacent to the park entrance and features a large open pavilion with tables and areas for gatherings and other outdoor activities. A restroom facility would be provided nearby and a parking lot constructed of pervious natural material is recommended.

NATURAL PLAYGROUND

The natural playground would incorporate the use of materials and textures found in nature such as tree logs, tree stumps, boulders and plants. This type of playground gives children the opportunity to run, jump, feel, smell, explore, imagine and be challenged by these natural elements.

EXPERIENCE THE OUTDOORS

Spending time exploring and connecting with nature provides children with a widerange of health benefits. Cobb County PARKS has close to 80 parks and 6,000 acres of park land. The Price Property is a unique piece because it is centrally located in West Cobb County and has the potential to connect with several other parks in the area to form a natural Greenway in the future.
