COUNTY DEVELOPMENT STANDARDS AND SPECIFICATIONS

103.19.1 FOOTINGS SURVEY (Page 100 – 25)

A footings survey is required to be prepared anytime a building footprint (foundation wall) is proposed to be constructed within five feet of any applicable setback. The failure to prepare such a footings survey shall be a principal factor in determining whether or not to grant a variance.

On any development, prior to obtaining a building permit, the permittee or landowner must file a copy of a current plan and survey of the property sealed by a registered land surveyor providing such information as shall be required from the Cobb County Development and Inspections Department or its successor.

Prior to commencing pouring of footings, it shall be the responsibility of the builder or developer to accurately and clearly flag all pin corner boundaries or building setback lines prior to any footings inspection. Should the developer or builder desire to place any footing within five (5) feet of the applicable building setback line, the builder or developer shall provide a footings (foundation) survey signed by a registered land surveyor showing the footing location and the outer perimeter of the proposed structure. The failure to provide such a footing survey shall be a primary consideration in whether or not the Board of Zoning Appeals may deny a variance application.
