

# Recognizing Our Community Partners

We protect and conserve our water resources in a vibrant and active community that works together.

A community partnership is an ongoing, supportive relationship between Cobb County Water System and a public, private, institutional or nonprofit organization. Our program provides on-site consultations, online resources and education needed for Community Partners to demonstrate environmental leadership. They implement practices which uphold shared values in water quality, conservation and environmental health.

We are honored to support and feature our community partner **Janice Overbeck Real Estate Team**, pictured on the right.

## *Collaborate with us!*

Interested in becoming a partner?  
Simply contact our staff directly at

# Partnership Benefits

Cobb County Water System prides itself in supporting our partners. Here are several ways we accomplish this:

- **Awards.** Our partners can become certified Community Partners. They receive a certificate, a letter of recognition, and are eligible for other traditional awards.
- **Capacity.** Our staff is willing to share our time and expertise to help bring projects to fruition.
- **Newsletter Articles.** Our partners are featured online and in print through our quarterly newsletter Water Matters!
- **Online Presence.** Each of our established partners is listed on a dedicated Partners web-page that features a direct link to their organization.
- **Social media.** We also feature updates and new partnership activity on our social media platforms such as Facebook and Twitter.
- **And more!** We are always looking for more ways to highlight our partners.
