Definition of Social Media

Social media includes web-based and mobile based technologies which are used to turn communication into interactive dialogue among organizations, communities, and individuals. Social media has been defined as "a group of Internet-based applications that build on the ideological and technological foundations of Web 2.0, and that allow the creation and exchange of user-generated content." [1]

Examples of social media include Facebook, Twitter, listservs, websites, and blogs. The intended purpose of all social media sites is to serve as a mechanism for communication between Cobb County Public Library and members of the public.

Purpose

In order to provide greater awareness of and accessibility to programs, services, and resources; Cobb County Public Library (CCPL) uses social media tools to reach a broader audience. CCPL encourages the use of social media tools to further the goals and mission of the system, when appropriate.
