

QSFP-4SFP25G-AOC20M-AO

Cisco® QSFP-4SFP25G-AOC20M Compatible TAA Compliant 100GBase-AOC QSFP28 to 4xSFP28 Direct Attach Cable (850nm, MMF, 20m)

Features

- QSFP28 and SFP28 MSA Compliant
- Supports 103.1Gbps Aggregate Bit Rate
- Four Independent Full-Duplex Channels
- 25G Electrical Interface (OIF CEI-28G-VSR) for SFP28 Terminal
- Maximum Power Consumption of 2.5W for QSFP28 Terminal and 1.0W for Each SFP28 Terminal
- 4x25G Electrical Interface (OIF CEI-28G-VSR) for QSFP28 Terminal
- Operating Temperature: 0 to 70 Celsius
- Single Power Supply of 3.3V
- RoHS Compliant and Lead-Free

Applications

- Infiniband EDR
- 100G Ethernet

Product Description

This is a Cisco® QSFP-4SFP25G-AOC20M compatible 100GBase-AOC QSFP28 to 4xSFP28 active optical cable that operates over multi-mode fiber with a maximum reach of 20.0m (65.6ft). At a wavelength of 850nm, it has been programmed, uniquely serialized, and data-traffic and application tested to ensure it is 100% compliant and functional. This active optical cable is TAA (Trade Agreements Act) compliant, and is built to comply with MSA (Multi-Source Agreement) standards. We stand behind the quality of our products and proudly offer a limited lifetime warranty.

AddOn's transceivers are RoHS compliant and lead-free.

TAA refers to the Trade Agreements Act (19 U.S.C. & 2501-2581), which is intended to foster fair and open international trade. TAA requires that the U.S. Government may acquire only "U.S.-made or designated country end products."

| 38 | | GND | Module Ground. | 1 |

Notes:

1. GND is the symbol for signal and supply (power) common for QSFP28 modules. All are common within the QSFP28 module, and all module voltages are referenced to this potential unless otherwise noted. Connect these directly to the host board signal common ground plane.
2. VccRx, Vcc1, and VccTx are the receiving and transmission power supplies and shall be applied concurrently. Recommended host board power supply filtering is shown below. VccRx, Vcc1, and VccTx may be internally connected within the QSFP28 transceiver module in any combination. The connector pins are each rated for a maximum current of 1000mA.

| 19 | CML-I | TD- | Transmitter Inverted Data Input. | |
| 20 | | VeeT | Module Transmitter Ground. | 1 |

Notes:

1. Module ground pins (GND) are isolated from the module case.
2. Shall be pulled up with 4.7kΩ to 10kΩ to a voltage between 3.15V and 3.45V on the host board.

About AddOn Networks

In 1999, AddOn Networks entered the market with a single product. Our founders fulfilled a severe shortage for compatible, cost-effective optical transceivers that compete at the same performance levels as leading OEM manufacturers. Adhering to the idea of redefining service and product quality not previously had in the fiber optic networking industry, AddOn invested resources in solution design, production, fulfillment, and global support.

Combining one of the most extensive and stringent testing processes in the industry, an exceptional free tech support center, and a consistent roll-out of innovative technologies, AddOn has continually set industry standards of quality and reliability throughout its history.

Reliability is the cornerstone of any optical fiber network and is ingrained in AddOn's DNA. It has played a key role in nurturing the long-term relationships developed over the years with customers. AddOn remains committed to exceeding industry standards with certifications ranging from NEBS Level 3 to ISO 9001:2015 with every new development while maintaining the signature reliability of its products.
