MC2206310-003-AO

Mellanox MC2206310-003 Compatible TAA Compliant 40GBase-AOC QSFP+ Active Optical Cable (850nm, MMF, 3m)

Features

- Support up to 4x10 Gbps bi-directional operation
- Compliant to the IEEE802.3ba
- SFF-8436 QSFP+ compliant
- Reliable VCSEL and PIN photonic devices
- I2C standard management interface
- Automatic power down while broken cable is detected to improve eye safety
- Low power consumption
- Excellent high speed signal integrity
- RoHS Compliant and Lead-Free
- Operating Case Temperature 0 to 70 Celsius

Applications

- Proprietary high speed, high density data
- 10G/40GBase Ethernet
- High performance computing, server and data storage

Product Description

This is a Mellanox[®] MC2206310-003 Compatible 40GBase-AOC QSFP+ to QSFP+ active optical cable that operates over active fiber with a maximum reach of 3m. It has been programmed, uniquely serialized, and data-traffic and application tested to ensure it is 100% compliant and functional. We stand behind the quality of our products and proudly offer a limited lifetime warranty. This cable is TAA (Trade Agreements Act) compliant and is built to comply with MSA (Multi-Source Agreement) standards.

AddOn's transceivers are RoHS compliant and lead-free.

TAA refers to the Trade Agreements Act (19 U.S.C. & 2501-2581), which is intended to foster fair and open international trade. TAA requires that the U.S. Government may acquire only "U.S. – made or designated country end products."

|----|-------|------|--------------------------------------|--|
| 37 | CML-I | Tx1- | Transmitter Inverted Data Input. | |

Notes:

- 1. GND is the symbol for signal and supply (power). Connect these directly to the host board signal common ground plane.
- 2. VccRx, Vcc1, and VccTx are the receiving and transmission power suppliers and shall be applied concurrently. VccRx, Vcc1, and VccTx may be internally connected within the QSFP+. The connector pins are each rated for a maximum current of 500mA.

About AddOn Networks

In 1999, AddOn Networks entered the market with a single product. Our founders fulfilled a severe shortage for compatible, cost-effective optical transceivers that compete at the same performance levels as leading OEM manufacturers. Adhering to the idea of redefining service and product quality not previously had in the fiber optic networking industry, AddOn invested resources in solution design, production, fulfillment, and global support.

Combining one of the most extensive and stringent testing processes in the industry, an exceptional free tech support center, and a consistent roll-out of innovative technologies, AddOn has continually set industry standards of quality and reliability throughout its history.

Reliability is the cornerstone of any optical fiber network and is in engrained in AddOn's DNA. It has played a key role in nurturing the long-term relationships developed over the years with customers. AddOn remains committed to exceeding industry standards with certifications from ranging from NEBS Level 3 to ISO 9001:2005 with every new development while maintaining the signature reliability of its products.
