

ADD-MRACK-16

19 inch Managed Media Converter Chassis with 16-Slot Rack Mount

Features

- Managed tools
- Configuration of active/standby power supply ensures uninterruptible operation of the system.
- Supporting simultaneous operation of several module type (module type) media converters at different rates, which greatly improves system adaptability
- Each card supports hot swapping

Product Description

This is a 19in managed media converter chassis with 16-slot rack mount. Offering a great space/performance ratio, this media converter covers various fiber media converter functions, including a variety of data rate, SM/MM, single and double fiber with simple setup. This is standard with dual redundant power supply and covers all functions of non-manageable fiber media converters with complete functional management interface. This supports protocols like SNMP, WEB, TELNET, and CONSOLE, and the integration with up to 4 managed racks. Our media converters and network interface cards are 100% compliant for all of our networking needs. Now you have a cost effective solution to your network upgrade needs.

Specifications

Parameter	Specification
Number of Slots	16
Structure	2U rack
Power Input	AC Voltage: AC 85~265V Frequency: 50/60Hz
Interface Type	DC voltage: DC-36~72V
Power Output	DC5V 16A
Ripple	<20mv
Power configuration	Single power supply; or Dual power supply for warm backup mode
LED Indication	Power (power supply)
Max. Power Consumption	80W
Operating Temperature	-10~55°C
Maintaining Temperature	-40~70°C
Maintaining Humidity	5%~90% non-condensing
Dimensions	485mm (W) x 245mm (D) x 90mm (H)

About AddOn Networks

In 1999, AddOn Networks entered the market with a single product. Our founders fulfilled a severe shortage for compatible, cost-effective optical transceivers that compete at the same performance levels as leading OEM manufacturers. Adhering to the idea of redefining service and product quality not previously had in the fiber optic networking industry, AddOn invested resources in solution design, production, fulfillment, and global support.

Combining one of the most extensive and stringent testing processes in the industry, an exceptional free tech support center, and a consistent roll-out of innovative technologies, AddOn has continually set industry standards of quality and reliability throughout its history.

Reliability is the cornerstone of any optical fiber network and is engrained in AddOn's DNA. It has played a key role in nurturing the long-term relationships developed over the years with customers. AddOn remains committed to exceeding industry standards with certifications from ranging from NEBS Level 3 to ISO 9001:2005 with every new development while maintaining the signature reliability of its products.
