1 Select the starter patch you want to use and edit
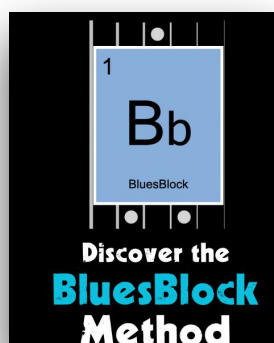

2 Enter Looping mode by pressing and holding both the LEFT and RIGHT footswitches - depending on your unit*

3 Change the looping mode from Post to Pre

4 Record your reference loop by pressing the LEFT footswitch

5 End your loop by pressing the RIGHT footswitch

4 Start your loop playing by pressing the LEFT footswitch

6 Press EXIT to move out of the looping screen and back to your patch

7 Press EDIT to access your effects chain and start tweaking your tone and have your reference tone playing to tone match without the faff!

8 Press SAVE twice to save your new epic tone!
