

From Your Family Project create a Service-as-a-product (Saap)
OR Product Idea for Your niche Community and start a Sole proprietorship

Companyzer™

Companyzer™ | YourFamily.Company™

[YourFamily.Pro™](#) | [YourFamilyProject™](#)-Initiative may lead to a Sole proprietorship
YourFamily.Company™-Instance, by creating a Service-as-a-product for your Family Project
Audience from The Public Family OR Product Idea You Propose to (an) Existing Business(es).

[YourFamily.Pro™](#) | [YourFamilyProgram™](#)-Initiative Mission is to try to attain PEACE Situation &
JOYOUS Moments for All People and Your Family Project tries to supply towards Authentic
needs of Your Nichè Family Community.

With perhaps Your to be designed Service-as-a-product (Saap), You may try to provide:

- Nichè Community:
 - Education
 - Instruction
 - Teachings
 - Community-/Group-/Individual Assignments
 - Guidance
- List of Requirements:
 - Human Resources
 - Volunteer(s)/Freelancer(s)/Employee(s)
 - Material Resources
 - Digital Resources

With perhaps Your Invented/Innovated Product Idea, You could perhaps approach (an) Existing Business. If possible, you would have done some field testing... for example... an innovated meal you have prepared on a bigger scale to be tested and reviewed at a Neighbourhood Gathering where Your Innovated meals are consumed and afterwards Review forms are filled out. Then initially send enough of Your Products Idea with Review report to Existing Business(es) to try to interest them to invite you to discuss your Product Idea for a possible Partnership between You and their Business.

This may enable you to use what is already there (like a professional kitchen for larger scale food preparation an existing business already has) who could with perhaps minor adjustments prepare your meal, instead of setting up your own professional kitchen, which would also require a (to be rented or purchased) property in which that kitchen would be located.
