

WHAT'S IN OUR WATER? LIVE

THU 18 SEP
9.15 to 10am

MON 22 SEP
1.30 to 2.15pm

For: KS2

Online: Microsoft Teams Live*

What's in our water? LIVE is an engaging, curriculum-linked live lesson for KS2 pupils that brings science and geography to life through real-world action. Developed by Earthwatch Europe, this interactive session immerses young learners in the world of fresh water, environmental threats, and the Great UK WaterBlitz a UK-wide citizen science project.

Aligned with national curriculum and timed to support World Water Monitoring Day (18 Sept) and the Great UK WaterBlitz weekend (19-22 Sept), this session empowers pupils to become scientists for a day and environmental champions for life.

If you live near a freshwater river, stream, lake or pond why not consider getting your class involved in the autumn 2025 WaterBlitz - sign up at earthwatch.org.uk/greatukwaterblitz/orgs/?org=school

or visit thestemhub.org.uk/events for more information and to book.

**Microsoft Teams Live is a platform with safeguarding built in, including no enabled webcams or microphones and moderated chat function.*
