Does Public Transportation leave the least 'footprint'?

Sustainability wise: most of the time, however...

What use is a sustainable Planet if PEACE lets to be HOPED for?

There is a big contradiction between sustainability focus and PEACE Focus.

Sustainability is very important, however for a Planet Earth at PEACE.

If We can't reach PEACE, who would want to 'sustain' and live longer at Planet Earth?

However, PEACE seems to be attainable, so let's talk about Your Motion...

PEACE 1st, Sustainability 2nd?

±70% Focus on PEACE & ±30% on Sustainability (e.g. Corporate Social Responsibility (C.S.R.) WISE)

So, not advocating to throw Sustainability overboard, however to place Priority on trying to attain PEACE, so that Sustainability makes sense.

Recycling for example, certainly has its place and is very important, while We move forward into The Future.

To attain PEACE, there are (only) 24 hours a Day, of which We use Time for sleeping, eating, drinking, body caring, clothing, shopping, learning, cleaning, managing and more (+ Our (Intentional) Professional Motion).

And it's that Professional Motion that may benefit beyond ourselves.

Our Professional Motion, Serious Business?

Sometimes Public Transportation cost more than it 'saves'...

It may save on 'carbon footprint', however it may cost (Intentional) Professional Effectiveness.

Traveling with poor connections/waiting costs: Time and where does that Time often come from... of left over Professional Spare Time.

PEACE-Oriented Professional Time is when We Serve. Sleeping, eating, drinking etcetera is when We consume. We believe that it's Service to Others' Situation that's going to attain PEACE, not mainly consumption.

Professional Space Extension?

Your Motion Business may include phone calling, private conversations, (music over the speakers while singing along)...

Which in Public Transportation such as a train, tram, metro & bus may let to be WISHED for.

A car, besides transportation, may also offer some private space, as a business/home extension on wheels.

Not suggesting in dept conversations which require a lot of thinking while driving a car, it may however be for (a) passenger(s) in the car who may do some private business, like a business (phone) conversation discussing (a) sensitive matter(s).

PEACE Impact Enhancer?

For a Professional, a car is not per definition a luxury, however WISHABLE Motion Equipment...

For personal use a car may be a luxury, however not for those with a 24/7 PEACE Business Mindset.

We're in this together!
