

# **”The Memory of Water and its Spiritual Nature” – Exploring the Consciousness and Power of Water**

Iris Boy Peña – Kyaron

## 01. The Mysterious Nature of Water

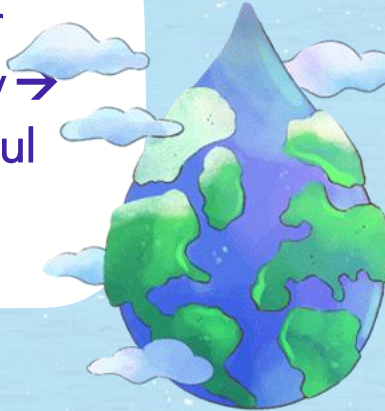

- Since ancient times, water has been considered a sacred element in many cultures and philosophies around the world. Water is believed to have the abilities to purify and heal the body, mind, and spirit. In Mayan culture, for example, water was seen as a divine element that connected the earthly world with the spiritual world
- No one knows where the water comes from, there are only theories – but it's the element that defies gravity and the physical laws of the planet

# We are 75–80% WATER! (H<sub>2</sub>O – the fourth phase of water)

- New Research Says We Carry Short-Term to Long-Term Memories in the Brain's Fascia/Hippocampus
- Fascia-Interstitium: Largest organ in the body with 10 liters of water and collagen, the most important communication system in our body → Only in living bodies – This is why it may be the “container” of our soul

- Luc Montagnier (1932-2022), Virologist and Nobel Prize laureate for discovering HIV
- "The Secret Intelligence of Water" Veda Austin, Water Researcher
- Korean physicist Dr. Mu Shik Jhon who dedicated forty years of his life to the study of the geometry of water, especially hexagonal or structured water
- Thomas Heronomous

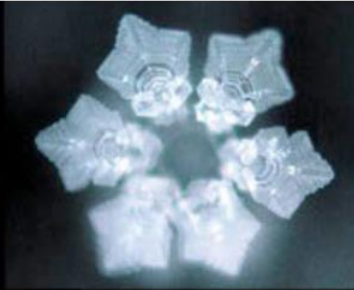

"Human thought, words, music, labels on packaging, influence water and it changes it either for the better or worse. If water does it, we who are 70-80% water should behave the same."

# But above all:

## BE CURIOUS!

Investigate, experiment and connect with water. There is much to discover and above all it is FREE and you have nothing to lose but EVERYTHING TO GAIN!

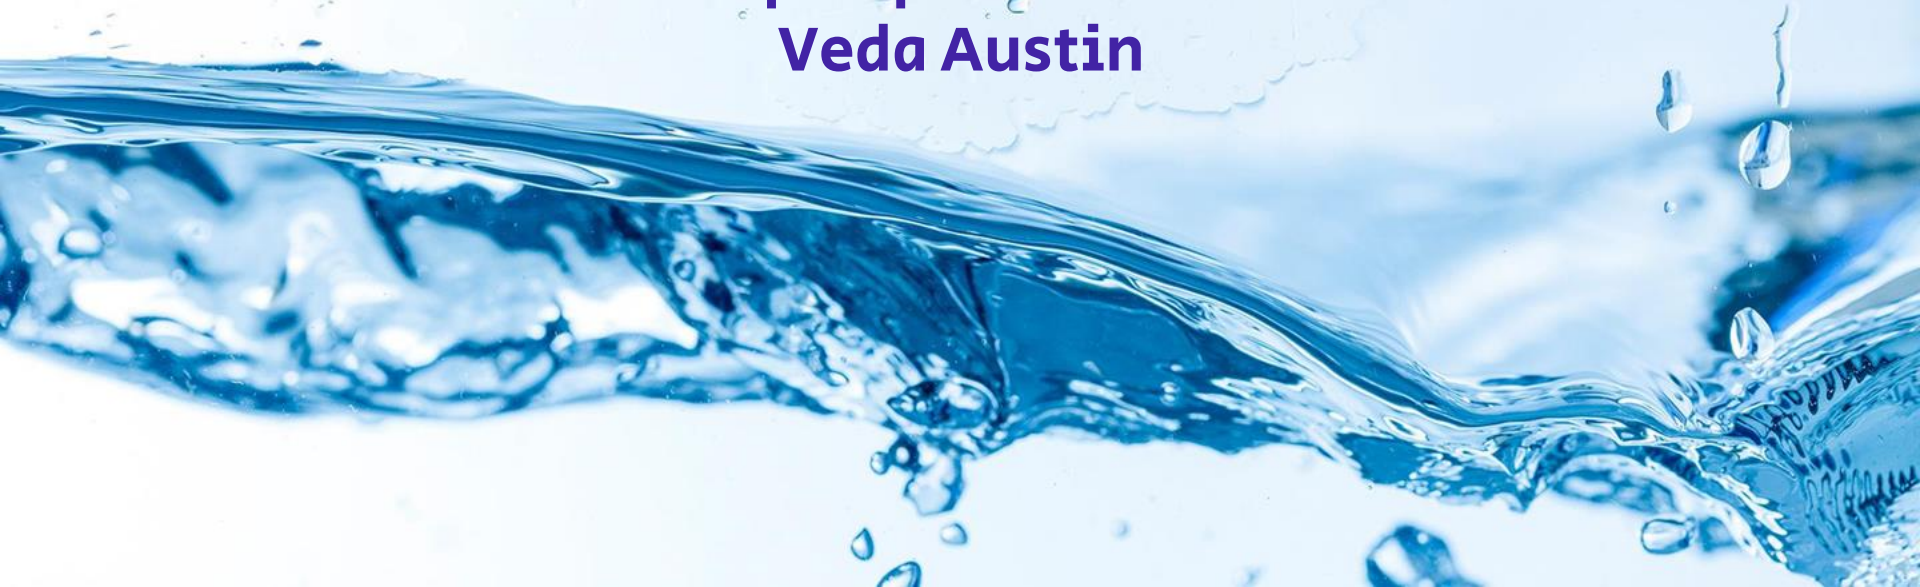

## PROTECT

Connect with the body of water closest to you and pray, sing, bless it. We are guardians of the water and change is in our hands!
