Description of the Course

Afrofuturism is a complex set of cultural aesthetic, literary and philosophical currents that explore intersections of past and future African diasporas with scientific and technological possibilities. This course examines the futurist currents in 20th/21st century African American literature, although viewed in the context of American colonial and republican history. We study how black authors have employed speculative genre so to reinvent the African American histories and futures. We also examine how futurism marks a new subjectivity that troubles essentialized discourses and practices of racial identity while offering alternative black futurity.
