COURSE SYLLABUS

Instructor: Dr. Catalina Reyes, PhD, MSc

E-mail: creyesgonzalez@ucsd.edu

Office: H&SS 1145A

Office hours: Wednesday and Friday 11-11:50 AM

Zoom https://ucsd.zoom.us/j/96555563585

I will be offering two office hours during the week. I will hold office hours over Zoom (see link above or access through Canvas calendar).

One-on-one or small group meetings are also available at selected times. To book a 30-minute meeting please email me.

ELECTRONIC COMMUNICATION

Please contact your Instructional Assistant (IA) for general inquiries. Make sure to include **BIPN 100** in the subject line. Due to the large number of students in the class we will **NOT** be able to answer individual questions about the content of the lectures by email. To get your questions answered please attend Catalina's office hours, IAs office hours, discussion sections, schedule a one-on-one meeting with Catalina or ask during or after class. If you have questions about course organization, please refer to the Syllabus or post your question on the Canvas discussion board.

Course website: https://canvas.ucsd.edu/

Weekly To-Do-Lists, announcements, lectures slides, assignments and grades will be posted on Canvas. PLEASE check on a regular basis.

IMPORTANT – Lectures, discussion sections, midterms and the final exam are **in-person**, with the exception of Friday, April 28 and May 26 (days of the midterms), in which we will hold the lectures on Zoom (https://ucsd.zoom.us/j/96555563585).

 All lectures and discussion sections will be podcasted. You can access these materials through Media Gallery in Canvas or at www.podcast.ucsd.edu

ACCOMMODATIONS: If you have a special circumstance or a family or medical emergency, please contact the instructor as soon as possible, so that we can find an accommodation.

LECTURE:

BIPN 100 A00 - Monday, Wednesday, and Friday 12 – 12:50 PM, PETERSON 108 BIPN 100 B00 - Monday, Wednesday, and Friday 10-10:50 AM CTL 0125

The lecture schedule (see below) is subject to change. **Lecture slides** will be posted on Canvas at least 24 hours before each lecture.

Date	Topic	Problem sets	
Week 1 Apr 3-7	Syllabus, and Membranes, membrane transport		
	• RMP, Ohm's law, Nernst equation, Goldman-Hodgkin-Katz equation		
	Neuron structure and function, channels		
Week 2	Action potentials, signal transmission along axons	Problem set 1	
	Synaptic transmission, neurotransmitters	r toblem set 1	
Apr 10-14	• Discuss assignment 1		
	Assignment 1 Equilibrium potentials DUE Friday, Apr. 14 - 9 AM		
	• Central nervous system components, functional anatomy of the brain		
Week 3	Functional anatomy of the spinal cord, reflex arcs		
Apr 17-21	• Discuss assignment 2	Problem set 2	
	Assignment 2 Action potentials, NMJ DUE Friday, Apr. 21 - 9 AM		
	Motor pathways, sensory physiology, example		
Week 4	Efferent division of the peripheral nervous system	Problem set 3	
Apr 24-28	Endocrinology, signal transduction, homeostasis, feedback loops		
	MIDTERM 1-Friday April 28, 6 PM -A PETER 108/B YORK 2722	Problem set 4	
	Endocrinology continuation		
Week 5	• Striated skeletal muscle – molecular mechanisms that generate force,		
May 1-5	contraction-relaxation cycle		
iviay 1-3	• Discuss assignment 3	Problem set 5	
	Assignment 3 Spinal injury DUE Friday, May 5 - 9 AM	1 Toblem set 3	
	Motor units, mechanics of body movement, fiber types		
Week 6	Smooth muscle		
May 8-12	Introduction to the cardiovascular system, cardiac anatomy		
iviay 0 12	Discuss assignment 4		
_	Assignment 4 Muscle DUE Friday, May 12 - 9 AM	Dual-lana and C	
Week 7	Cellular cardiac physiology, myogenic contraction, electrophysiology	Problem set 6	
May 15-19	Electrocardiogram and Practice		
1.100 10 15	Cardiac mechanics and Practice		
	Regulation of heart function by the ANS	Problem set 7	
Week 8	Hemodynamics: systemic and pulmonary loops, Ohm's law		
May 22-26	Hemodynamics: Ohm's law, exchange between blood and tissues		
	MIDTERM 2 – Friday May 26, 6 PM -A PETER 108/B YORK 2722	Problem set 8	
Week 9	• May 29 - NO CLASS		
May 29-	Regulation of the cardiovascular system: CO and BP		
Jun 2	Osmolarity, body fluid compartments: kidney anatomy and function	Problem set 9	
	Assignment 5 PV loops, Wigger's DUE Friday, June 2 by 9 AM		
Week 10	Renal cortex: filtration and reabsorption	Problem set	
Jun 5-9	Renal medulla: gradients, water permeability, Vasopressin	10	
	Assignment 6 PV Osmolarity DUE Friday, June 9 by 9 AM		
June 10	Final Exam – CUMULATIVE – 8 AM		

OPTIONAL TEXTBOOK: Human Physiology, 8^{th} edition by Dee Silverthorn. The 7^{th} , 6^{th} and 5^{th} editions are fine.

IMPORTANT – the textbook is **NOT** mandatory. However, a digital inclusive version of the textbook will be provided by the UC San Diego Bookstore through the RedShelf tool on Canvas. You have a two-week period to decide if you want to keep access or opt out. If you keep access, you will be charged \$32.94 for perpetual access to the eBook. If you have any questions concerning Inclusive Access, please contact the Bookstore at textbooks@ucsd.edu or email help@redshelf.com

Even though the text is **not required**, and the exams will **only** include the material seen in class, I provided recommended readings from the text for each topic. During the quarter journal articles may be posted as assignments.

OBJECTIVES FOR THE COURSE

- 1. Learn how different systems in the human body work together to maintain homeostasis.
- 2. Learn the anatomy of the systems discussed in class.
- 3. Learn anatomical, physiological, and biomedical terms.
- 4. Learn how to read graphs and images.
- 5. Ability to apply the knowledge acquired to solve physiological and medical problems.
- 6. Develop critical thinking skills.

TO SUCCEED IN THIS COURSE, YOU MUST DO THE FOLLOWING:

- 1. Work hard. Go over the material every week.
- 2. Learn the terminology and concepts. There are two components important when learning physiology: memory and understanding. You will have to memorize anatomical and physiological terms, but to succeed you must understand the concepts and physiological processes and learn to critically think about physiology.
- 3. Read through the power point presentations before lectures.
- 4. Take notes while listening to the lectures.
- 5. Attend a discussion section.

DISCUSSION SECTIONS: During section, IAs will cover problem sets, you will be able to ask questions about the lecture material and important material will be reviewed.

Discussion sections will take place at the scheduled times and locations, although there are a few Zoom discussion sections. Discussion sections are worth 3% of your grade. If you attend 6 discussion sections, you will earn full points.

You will be able to attend any discussion section **if there is space**. Please contact the IA in your registered section and the IA of the discussion section you want to attend to inquire about switching sections. IAs will approve or deny your request by week 2.

PROBLEM SETS

Problem sets are posted on Canvas. These questions are intended to further your understanding of the concepts learnt in lecture. Problem sets will be covered during discussion sections and the answers will be posted before the midterms. Problem sets are for practice, and you do not need to hand them in, unless you have a special circumstance and will still like to obtain the 3% of your grade.

DISCUSSION FORUMS will be available through CANVAS for students to post questions.

EXAMS, ASSIGNMENTS AND GRADING:

ASSIGNMENTS:

- Assignments are short physiology exercises evaluating each week's lecture materials. They are intended to give you an idea of the midterm and final exam questions.
- There are a total of 6 assignments worth **10%** of the final grade.
- 4% will be given for **completion** and **6%** will be given for **accuracy**, for a total of 10%
- Assignments will be posted on Canvas by 9 AM on **Fridays** (except on Midterm weeks). To access the Assignment, go to the Quiz Tab on the left panel of your Canvas page. Please use Chrome and don't click submit until you have answered all questions.
- Assignments are **timed** (allotted time will vary) and will close by **9 AM** on Friday of the following week (see dates below and on the schedule).

Assignment	Release date	Due date
Assignment 1	Friday April 7	Friday April 14 – 9 AM
Assignment 2	Friday April 14	Friday April 21 – 9 AM
Assignment 3	Friday April 28	Friday May 5 – 9 AM
Assignment 4	Friday May 5	Friday May 12 – 9 AM
Assignment 5	Thursday May 26	Friday, June 2 – 9 AM
Assignment 6	Friday June 2	Monday June 9 – 9 AM

CLASS PARTICIPATION

Active participation in lecture is important for your learning. There will be several opportunities during lectures to participate. Participation points will be 2% of your grade.

Lecture participation points will start counting on the Monday of week 2, April 10. To accommodate for technology issues, absences or any other circumstances, full attendance points will be given if you attend and click in **15 lectures out of 27**. This allows you to miss 3 weeks (9 lectures) and holidays or Midterm days after the first week. If you are sick, please use this dropped lectures and stay home.

If you have a situation that will cause you to miss more than three weeks, please contact us right aways, so that we can consider other options.

MIDTERM EXAMS:

- Each in-person midterm exam will be based on material for that section of the course up to the lecture preceding the exam.
- Each midterm is worth 25% of the final grade.
 - Midterm 1 Friday, April 28, 6 PM -Class A00 PETER 108 Class B00 YORK 2722
 - Midterm 2 Friday, May 26, 6 PM -Class A00 PETER 108
 Class B00 YORK 2722

Please attend the classroom assigned to you by the Registrar.

Exam scores will be available after grading, but the exam answers will not be posted. All questions about the content of the exams will be addressed in office hours.

MISSING MIDTERM EXAMS

If you miss a midterm exam, you will be required to provide official documentation of an unavoidable emergency (serious illness, etc.) as soon as possible. The policy stated below (Grading) will **accommodate for the eventuality of disease or any other emergency**. Regardless, if you are sick or concerned that you would endanger other by attending an in-person exam, please contact me as soon as possible to go over your options.

FINAL EXAM:

Please note that the final exam has been scheduled by the registrar and the policy is not to change the day or time of the final exam. **Everyone must take the final exam**; it cannot be dropped. If there is an exceptional circumstance, or you are sick, please contact me as soon as possible. We will likely schedule an oral exam.

The final exam is scheduled for SATURDAY, JUNE 10, 8 - 11 AM

- The final exam will be cumulative and in-person.
- 35% of the final grade

Please bring a **photo ID** to the midterms and final exam as we will be checking it. Students who do not have photo ID, will not be able to take the exam.

GRADING:

- If your final exam score is higher than **BOTH** midterms, the final exam will be worth 85% and the midterms grades will be removed.
- If one of your midterm exams (for example Midterm 1) is lower than the final exam, then the 25% of the lower midterm will be split in the following way:
 - If your other midterm score (in this case Midterm 2) is higher than your final exam score, then 10% of the missed/low score midterm will be placed on the higher score

midterm (in this case Midterm 2) to make that midterm worth 35% of your final grade. The remaining 15% (from Midterm 1 in this example) will be added to your final exam score, so that the final exam would be worth 50% of your final grade.

• If the other midterm score (in this example Midterm 2) is also lower than your final exam score, then both midterms are lower than the final exam and the final is worth 85% of your final grade.

IMPORTANT - Please note that UCSD's policy is that "Vaccinated students who have been exposed [to COVID-19] are allowed to attend class and move about campus masked" which includes attending in-person exams. This does not include people who have COVID symptoms or a positive test result. You can find an up-to-date policy and more details here: https://returntolearn.ucsd.edu/return-to-campus/exposure-contact-tracing/index.html

GRADE SCALE

The **top 5 grades** in each **midterm** will be averaged and **normalized** to a 100%. All other exam grades will be normalized accordingly.

The final grade will follow the table below. The final grade may be **CURVED**.

Letter Grade	Percent grade
A+	98-100
A	92-97
A-	90-91
B+	88-89
В	82-87
B-	80-81
C+	78-79
С	72-77
C-	70-71
D	60-69
F	<60

COURSE POLICIES

REGRADES

Occasionally errors, or ambiguities occur in an exam question. If you have a specific issue with a question, please email Catalina within 24 hours of completing the exam. The IAs and I will evaluate the question and we could either not change anything (if we think the questions is fair) or we could remove the question from the exam for the whole class.

If you have a specific concern about how an answer to an exam question was graded email the IA who graded the question, include BIPN 100 in the subject. You must do this within **one week** of the exam being graded and available for viewing. Late regrades **WILL NOT** be accepted.

Cheating Any student caught cheating will receive an F in the course and will be reported to the Academic Integrity office. For information on academic integrity at UCSD visit the following website http://senate.ucsd.edu/manual/appendices/app2.htm

All academic work you submit for this course should be your own new original work. Exams are closed book and you must complete these exams without access to other resources or the person seating next to you. If we suspect you are cheating, we will remove your exam and submit your case to academic integrity.

Assignments are open book, but you must explain your answers in your **own** words. Assignments are to be completed **individually**, if we see two students with the same answers your case will be sent to academic integrity.

IMPORTANT – Please do not post any class lectures, documents, problem sets, assignments, or exam questions on public websites. These materials are my intellectual property, and you must not make them public without my authorization.

STUDENTS WITH DISABILITIES

If you have a disability that might affect attendance or performance in the class, contact your IA or instructor as soon as possible, so that we can work with you in providing reasonable accommodations. To ensure proper support, anyone who requests accommodations due to a disability must get a current Authorization for Accommodation (AFA) letter issued by the Office for Students with Disabilities (OSD). To contact OSD, use the student portal https://academicaffairs.ucsd.edu/sso/osdsp/home, or email the Biology OSD liaison at bioosd@ucsd.edu, or call 858-534-4382.

HELPFUL RESOURCES AT UCSD

technologies like Zoom and Canvas.

If you are feeling overwhelmed, experiencing anxiety, depression or other condition please let us know as soon as possible. We can support you and give you some guidance on what resources are available at UCSD to ensure you can succeed during difficult times.

Psychology & Physical Safety* **Basic Needs Academic Support** OASIS (http://oasis.ucsd.edu) CAPS (http://caps.ucsd.edu) **Triton Food Pantry** The Office of Academic Support & CAPS offers free, confidential (http://basicneeds.ucsd.edu/trito Instructional Services (OASIS) counseling. They can help with n-food-pantry/) The Triton Food Pantry discreetly offers math and science tutorial urgent crises, such as an assault Programs for everyone. They also or thoughts of self-harm. They offers food for current UCSD have services and scholarships for can also talk if you are worried students to ensure each of you has those of you who have overcome about a friend or classmate. enough nutrition to get through the significant obstacles to become day. successful (like being first in your **CARE at SARC** families to go to college). http://care.ucsd.edu The Hub (https://basicneeds.ucsd.edu) Campus Advocacy, Resources, and Education at the Sexual The Hub serves those of you who **Teaching + Learning Commons** (http://commons.ucsd.edu) Assault Resource Center (CARE have trouble accessing basic The Teaching + Learning Commons at SARC) offers support for needs, including food or stable offers tutoring, consultations, and those of you who have housing, or who have financial workshops on learning strategies as experienced sexual violence or emergencies. They can help you well as assistance with writing in the violence from a partner. They connect with a variety of on- and Writing + Critical Expression Hub. have free confidential off-campus programs, including counseling, including on nights the Food Pantry, CalFresh, **Educational Technology** and weekends. emergency loans, emergency (https://digitallearning.ucsd.edu/le housing, or changes to your arners/learningfinancial aid. remotely/tools.html) EdTech has resources for understanding educational

Reading list

Topic	Silverthorn 8 th ed
Background, membranes, membrane transport	32-47, 130-160, 175-177
Resting membrane potential, Ohm's law, Nernst equation, Goldman-Hodgkin-Katz equation	161-166, 248-251
Neuron structure and function, channels	239-245
Action potentials, signal transmission along axons,	251-261
Synaptic transmission, neurotransmitters	266-273, 274-277
• Central nervous system components, functional anatomy of the brain	299-308
• functional anatomy of the spinal cord, reflex arcs	291-298, 442-451
Motor pathways, sensory physiology	
• Efferent division of the peripheral nervous system	327-340, 391-393, 454- 457
• Endocrinology, signal transduction, homeostasis, feedback loops	207-216
Endocrinology continuation	219-223
Striated skeletal muscle – molecular mechanisms that generate force, contraction-relaxation cycle	400-413
 Motor units, mechanics of body movement, fiber types 	414-420
Smooth muscle	427-433
• Introduction to the cardiovascular system, cardiac anatomy	463-464, 471-479
 Cellular cardiac physiology, myogenic contraction, cardiac electrophysiology 	483-485
Cardiac electrophysiology, electrocardiogram	486
Cardiac mechanics	487-498
Regulation of heart function	
 Hemodynamics: systemic and pulmonary circulatory loops, Ohm's law for blood flow 	
 Hemodynamics: material exchange between blood and tissues 	466-471
• Regulation of the cardiovascular system: CO and BP	513-528
Body fluid compartments: kidney anatomy and function	627-633
• Renal cortex: filtration and reabsorption	634-646
• Renal medulla: gradients, water permeability, Vasopressin	644-677
Metabolism, membranes, diffusion, osmosis, tonicity	61-62, 134-150
 Resting membrane potential, Ohm's law, Nernst equation, Goldman-Hodgkin-Katz equation 	153-158, 236-239
Neuron structure and function, channels	227-233
• Action potentials, signal transmission along axons,	240-251
Signal transmission along axons continuation, synaptic transmission	253-263
CNS components, spinal cord, reflex arcs	277-284, 291, 421

Functional anatomy of the brain	285-294
Sensory physiology, motor pathways	294, 311-324, 371
Efferent division of the peripheral nervous system	360-367
Endocrinology	169-175, 197-213
Striated skeletal muscle – molecular mechanisms that	379-396
generate force, contraction-relaxation cycle	
Motor units, mechanics of body movement, fiber types	393, 396-400
Smooth muscle	404-410
• Introduction to the cardiovascular system, cardiac anatomy	436-437, 443-447, 439-
	442
Cellular cardiac physiology, myogenic contraction, cardiac	449-455, 490
electrophysiology	
Electrocardiogram	457
Cardiac mechanics	461-464
• Hemodynamics: systemic and pulmonary circulatory loops, Ohm's law for blood flow	479-495
Hemodynamics: material exchange between blood and tissues	496-497
Regulation of the cardiovascular system: Cardiac output and BP	482-487
Body fluid compartments: anatomy and function of the	590-591
kidneys	
Renal cortex: filtration and reabsorption	594-606
Renal medulla: gradients, water permeability and	619-632
Vasopressin
