Course Goals: The overall objective of this course is to provide an overview of the existing national tax structure in the United States, its effects on individual and firm decisions, and the resulting efficiency costs and distributional consequences. We then examine several commonly proposed tax reforms.

Prerequisite: Economics 100A, or permission of the instructor

Exams: There will be two in-class midterm exams, each counting for 25% of the final grade. The dates are listed below. The final exam will count for the remaining 50% of the final grade. Grading will be on a curve.

The midterms can raise your numerical grade but cannot lower it: I will use the maximum of your score on the final, your weighted score using in addition either midterm, or your weighted score using in addition both midterms, to determine the final ranking. There will be no make-up exams for these midterms. If you cannot take either or both midterm exams, then your final grade will be based on those exams that you do take.

Readings: The basic readings for the course come from:

Gruber: Jonathan Gruber, *Public Finance and Public Policy* and

SB: Joel Slemrod & Jon Bakija, *Taxing Ourselves* (any editions)

Designated chapters are from edition 3 of Gruber and edition 4 of SB. It is fine to use a different edition, but if you do you need to take into account that the chapter numbers may differ by edition.

Lectures: The lectures are an integral part of the course, and will go well beyond the required readings.
