

# LABEL MATERIAL GUIDE

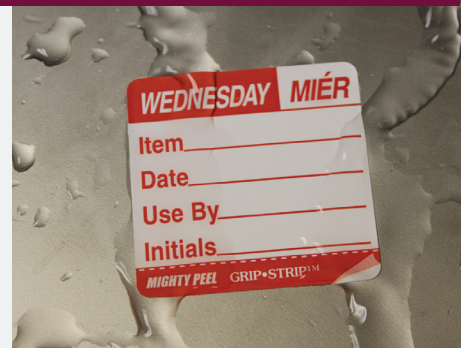

## DISSOLVE-IT™

Dissolve-It dissolves away completely in 30 seconds with any water temperature. Leave this label on your reusable container, place it in the dishwasher, and the dishwasher will do the rest. Dissolve-It is a great solution if you wish to eliminate the labor of scrubbing labels off of your pans.

## MIGHTY-PEEL™

Mighty Peel is a durable, plastic material with a special removable adhesive that allows the label to remove cleanly every time. It is water resistant and holds up well in any kitchen environment. The special removable adhesive makes the labels repositionable, allowing you to move the label from one pan to another.

## ULTRA-REMOVABLE™

Like Mighty Peel, Ultra Removable has a removable adhesive, but has a basic paper face. Because this material is less expensive, it offers a more cost effective option while providing an effective removable alternative. Ideal for reusable containers.

## COLD-TEMP™

Cold Temp labels have a strong, permanent adhesive. It is designed for freezer applications, such as frozen containers or containers that will be submerged in ice. Cold Temp is great for disposable containers, plastic wrap, and foil.

Material Type	Removability	Freezer Safe	Moisture Resistance	Minimum Application Temp.	Working Temp Range
DISSOLVE-IT™	● ● ●	●		20° F	40° F to 173° F
MIGHTY-PEEL™	● ● ●	● ●	● ●	40° F	-65° F to 180° F
ULTRA-REMOVABLE™	● ●	● ●	●	40° F	-65° F to 180° F
COLD-TEMP™		● ● ●	● ●	38° F	-65° F to 200° F
