

Albuquerque's Energy Transformation

Kelsey Rader, Sustainability Officer, krader@cabq.gov, City of Albuquerque

Summary

How will we get to 100% renewable energy by 2025? With only 12% remaining, the City has used a multi-faceted, collaborative approach to meet the Mayor's sustainability commitments.

Milestones

- 25 MW from Solar Direct facility
- Distributed Generation: 7 MW capacity from 38 solar projects
- Continuous municipal energy efficiency retrofits with 115 completed projects to date and saving over 220 GWh.
- Cities Race to Zero Campaign Pledge

Next Steps

- Support community solar and other distributed generation projects
- Deploy Energy Savings Performance Contract (ESPC)
