

Eatonville Power & Light

June 2023

Jesse Carroll, Matt Rivera & Clay Kistenmacher

Items that are business as usual to include:

Disconnects/Reconnects

Locates for Customers and Contractors

Meter changes due to age or damage

Other projects we have been working on:

Continued work on Ridge Rd. to transfer services to a new pole. So, we set a new pole in the alley to help support some of the older equipment as we transfer lines. Placed a down guy on the pole behind the Softball field to help support existing equipment as we transfer.

Getting supply items and ordering parts and equipment to prepare some of the Capitol projects to get started. We will stock the items until we can move forward to doing the work.

Experienced a couple outages this month. One was lightning struck a line and damaged some equipment. We were able to replace or work around it and restore power. Another was a bird got inline of an overhead primary. We found the problem and made the repairs.

Safety Meeting: metering & general safety
