I. STAFF ANALYSIS & RECOMMENDATIONS – TIBEER INVESTMENTS:

Pursuant to EMC 18.09.050, the requested Zoning Map Amendment/Rezone is permissible with a recommendation by the board of adjustment and approval through ordinance by the Eatonville Town Council.

In consideration of Staff recommendations, the Board of Adjustment is minimally required to make the following general findings in rendering a rezone decision, which include whether or not:

1. The proposed rezone is consistent with the comprehensive plan;
2. The proposed rezone and subsequent development of the site would be compatible with development in the vicinity;
3. The proposed rezone will not unduly burden the transportation system in the vicinity of the property with significant adverse impacts which cannot be mitigated;
4. Circumstances have changed substantially since the establishment of the current zoning district to warrant the proposed rezone;
5. The proposed rezone will not adversely affect the health, safety and general welfare of the town.

Based on the scope of the proposal and the existing pattern of development, it is Staff's opinion that the request is consistent with the Town's comprehensive plan if the future land use map is amended to reflect these changes.

Second, Staff believes the proposed rezone and subsequent development of the site would be compatible with development in the vicinity

Third, the Staff believes that the proposed rezone will not unduly burden the transportation system in the vicinity of the property with significant adverse impacts which cannot be mitigated

Fourth, it is the Staff's opinion that circumstances have changed substantially since the establishment of the current zoning district to warrant the proposed rezone.

Fifth, the proposed rezone will not adversely affect the health, safety and general welfare of the town.

II. STAFF ANALYSIS & RECOMMENDATIONS – TOWN OF EATONVILLE:

Pursuant to EMC 18.09.050, the requested Zoning Map Amendment/Rezone is permissible with a recommendation by the board of adjustment and approval through ordinance by the Eatonville Town Council.

In consideration of Staff recommendations, the Board of Adjustment is minimally required to make the following general findings in rendering a rezone decision, which include whether or not:

1. The proposed rezone is consistent with the comprehensive plan;
2. The proposed rezone and subsequent development of the site would be compatible with development in the vicinity;
3. The proposed rezone will not unduly burden the transportation system in the vicinity of the property with significant adverse impacts which cannot be mitigated;
4. Circumstances have changed substantially since the establishment of the current zoning district to warrant the proposed rezone;
5. The proposed rezone will not adversely affect the health, safety and general welfare of the town.

Based on the scope of the proposal and the existing pattern of development, it is Staff's opinion that the request is consistent with the Town's comprehensive plan if the future land use map is amended to reflect these changes and there

Second, Staff believes the proposed rezone will further preserve the site and support the public land use designation.

Third, the Staff believes that the proposed rezone will not unduly burden the transportation system in the vicinity of the property with significant adverse impacts which cannot be mitigated

Fourth, it is the Staff's opinion that circumstances have changed substantially since the establishment of the current zoning district to warrant the proposed rezone. Development along the Mashel River in the proposed rezoned area is unlikely, especially with MU zoning. SF-1 is the lowest intensity zoning the Town has and the public use land use designation alludes to future zoning changes to further preserve Town land along the Mashel River.

Fifth, the proposed rezone will not adversely affect the health, safety and general welfare of the town.

Supplementary Findings and Recommendations: On February 17th, 2026, the Planning Commission, with direction from staff also recommended removing the Public Use Open Space layer from the zoning map, as it does not correspond with any zoning code or the comprehensive plan land use designations.

III. FINDINGS OF FACT:

1. Pursuant to EMC 18.09.050., the applicant submitted a petition for the rezone of the following parcel: 0416231053
2. Pursuant to RCW 36.70.410 the application submitted a petition for a comprehensive plan amendment activated by the potential rezone of parcel: 0416231053
3. A SEPA Determination of non-significance (*a DNS*) was made December 10th , 2025, with a comment period ending at 5:00 PM on January 5th , 2025.
4. Public hearing notice was published in a local newspaper at least 10 days prior to the public hearing as well as all properties within 300 ft. of the proposed parcels to be rezoned.
5. The project has been reviewed by Public Works and found compliant with concurrency management, including compatibility with the 2024 comprehensive plan if the future land use map is amended and there is not an undue burden on future housing stock based on current buildable lands data.

I. Introduction:

We respectfully request a zoning change for 27.6 acres at the address above from MU to C-2

II. Evaluation of Rezone request based on EMC 18.09.050(C) Criteria.

1. Consistency with the Comprehensive Plan: The rezone will require a comprehensive plan amendment, as the land use designation will be changing. The amendment will require an update to the future land use map and ultimately change the land use potential of the property. Mixed use zoned properties require a PUD with a minimum density of 6 residential units per acre, whereas the C-2 has no minimum density and a minimum lot size of 10,000 SF. Additionally, there is no required housing for developments in the C-2 zone where the MU zone mandates high density residential housing of different varieties, making housing allocations and future land use of the property more ambiguous if rezoned to C-2, furthermore provoking the need for a comprehensive plan amendment.
2. Compatibility with surrounding development: The properties to the North and East of this property are already zoned C-2. The only other property in town zoned MU is the Center Point Church property. They have no intention of developing that property past building their church.
3. Transportation and infrastructure impact: Property abuts Madison to the West and Weyerhaeuser to the East. No immediate development is planned so there is no immediate impact on traffic or infrastructure.
4. Changing circumstances since initial zoning: Need for more flexibility in developing the largest piece of raw land left in the Town. Commercial land in the UGA has since been removed by Pierce County.
5. Public health, safety and general welfare: Concentration of the C-2 zone in this area will not have an adverse effect on public health, safety and general welfare as this area is largely zoned C-2 already and is developed with high intensity commercial uses.

Rezoning to allow for more flexibility allows property owners to make decisions that will most enhance the financial health of the Town, whether that be through more housing, more commercial space or some combination of the two. Concentration of the C-2 zone in this area will not have an adverse effect on public health, safety and general welfare.

6. Conclusion: The proposed zoning change from MU to C-2 allows more flexibility for development that will benefit the Town through increased property tax revenue and potentially increased sales tax revenue, as the C-2 zone allows for greater commercial capacity than the MU zone.
