

How to Floss

1. Use about 18 inches of floss wound around one of your middle fingers, with the rest wound around the opposite middle finger.

2. Hold the floss tightly between the thumbs and forefingers and gently insert it between the teeth.

3. Curve the floss into a "C" shape against the side of the tooth.

4. Rub the floss gently up and down, keeping it pressed against the tooth. Do not pull or break the floss.

5. Floss all your teeth including those in the back of your mouth.
