

# Take Control of Your Health

Eisner Health and Abram Friedman Occupational Center (AFOC) want you to know how to prevent HIV/AIDS infection and where to get help.

## Which percentage do you fall into? Do you REALLY know for sure?

- There were about **58,000** people living with HIV in Los Angeles County in 2019.
- An estimated **91%** (52,780) of persons living with HIV were aware of their HIV status.
- That left (5,220) **9%** of persons unaware of their HIV status.

## Get the facts!

### WE OFFER FREE, PRIVATE, AND CONFIDENTIAL SERVICES

- Presentations to learn about HIV/AIDS and to how to reduce the risk of an infection
- Individual talks with students who have questions about HIV/AIDS or want to know about their own risk
- One-minute HIV INSTI Rapid Testing\*
- Facilitate access to resources for prevention, such as Pre-Exposure Prophylaxis (PrEP) and Post-Exposure Prophylaxis (PEP) as needed or requested. PrEP and PEP are prevention methods for people who are HIV-negative and have a high-risk of being exposed to HIV
- Facilitate access to Eisner Health for primary care services

\*Test type may vary depending on availability

We are here to help, visit [eisnerhealth.org/hiv-ed](https://eisnerhealth.org/hiv-ed).
