

SECOND COVID-19 Vaccine Booster Doses

The US government has updated its COVID-19 vaccination guidance that some people **may** receive a second booster dose using an mRNA COVID-10 vaccine **at least four months** after the first booster dose.

People age 50
years and older.

People age 12 years and older
who are moderately or severely
immunocompromised.

People age 18 years and older
who received Janssen as both
primary and booster dose.
