

Take Control of Your Health

Eisner Health and Abram Friedman Occupational Center (AFOC) want you to know how to prevent an HIV/AIDS infection and where to get help.

Which percentage do you fall into? Do you REALLY know for sure?

- There are about **59,400** people living with HIV in Los Angeles County.
- **89%** (52,600) of persons living with HIV are aware of their HIV status.
- This means (6,800) **11%** of people in LA County are unaware of their HIV status.
- The number of HIV infections in LA County has increased in recent years

Get the facts!

WE OFFER FREE, PRIVATE, AND CONFIDENTIAL SERVICES

- Individual counseling with students who have questions about HIV/AIDS and want to understand their own risk
- One-minute HIV INSTI Rapid Testing*
- Facilitate access to resources for prevention, such as Pre-Exposure Prophylaxis (PrEP) and Post-Exposure Prophylaxis (PEP) as needed or requested. PrEP and PEP are prevention methods for people who are HIV-negative and have a high-risk of being exposed to HIV
- Facilitate access to Eisner Health for primary care services
- Classroom presentations available for students to learn about HIV/AIDS and to how to reduce the risk of an infection

*Testing occurs at Eisner Health.

We are here to help. Visit eisnerhealth.org/hiv-ed
