

MARCH-APRIL 2023

Introducing the Newest Passkey Partner: Agcor by AQUAOSO Technologies, PBC

Agcor™ by AQUAOSO Technologies, PBC is a suite of software tools purpose-built by and for agricultural lenders. From marketing, appraisal, risk, reporting, and collateral management processes, Agcor securely integrates your key data sets across different platforms into a single unified, location-based data source delivering benefits to your entire organization.

With Agcor's map-based view of your data combined with other third-party data sets, you will cut through the noise to gain a new level of insight on your customers, your portfolio and your market:

- **Research & Appraisal** is a one-stop shop for data that saves time with detailed, location-based parcel-level data, maps and objective documentation, removing data silos and improving the customer experience.
- **Portfolio & Collateral Management** adds spatial context to your portfolio to provide valuable insights, simplifying decision management and making portfolio level as well as regulatory reporting easy.
- Optional **Climate** and **Water Intelligence** add-ons allow you to quickly understand hyper-local climate-related issues in your territory for your borrowers, identifying impacted borrowers for proactive assistance and overall portfolio management.

Agcor's SOC 2 Type 2 compliant and integration-friendly platform allows you to deeply understand the market to find new customers, securely centralize your data, analyze your portfolio, and quickly get to the heart of your borrowers.

As a long-time, trusted Farm Credit partner, we are dedicated to solving the unique challenges associated with agricultural lending. See what Agcor can do for your team. Contact kyle.kauffman@aquaso.com.
