Cultivator Highlight

National Exclusive at Prairie Cannabis!

The Lucky 7 team grows their plants indoors, inside a built-for-purpose facility which is designed to recreate the exact environment that our plants need to flourish. Lucky 7 has constructed a super modern building and installed ultra-efficient equipment that allows each of the rooms to have its own weather system and are completely isolated from each other and the weather outside. The result is the ability to grow the finest cannabis all year long, while maintaining high levels of energy efficiency.

"We chose to focus on growing our plants in small batches with personal attention by our team of experienced master growers. The same growers who

carefully selected our inventory of unique strains to meet the needs of our local market."
