Welcome

Welcome to the 16th iteration of the Australasian Organometallic Meeting, OZOM16. Held every ~2 years, OZOM is the **premier organometallic chemistry conference** in the Southern Hemisphere. The 2027 conference will be brought to you in collaboration with the Royal Australian Chemical Institute (RACI) and the University of Tasmania.

About

Held over 9–12 February 2027, OZOM16 will bring together **over 100 researchers** in the field of organometallic chemistry, mainly from Australia, New Zealand and parts of Asia.

Organometallic chemistry is a **diverse field** of chemical research, incorporating **chemical synthesis, catalysis, materials and chemical analysis and characterisation**. OZOM16 delegates will be equally diverse, ranging from students to research group leaders, from some of the top universities around Australia and New Zealand. The event is also heavily attended by early career researchers looking to set up their own research labs.

Sponsorship from companies involved in chemistry will receive **maximum exposure** to the Aus, NZ and Asian organometallic chemistry community. This presents a unique opportunity to build and reinforce **strategic relationships** with research groups in some of the leading research institutes around Australasia. Furthermore, the conference is a **cost-effective** way to reinforce your company's brand and build brand awareness amongst a relevant audience.
