**Actually, There aren't More Fish In The Sea, There Are Less**

**Mon, June 19, 2023**

**Fish Biomass in Belize has been depleted, according to a study conducted by Daniel Pauly, a Canadian Professor of Fisheries who has spent the last year studying the decline of fish populations in Belize.**

**On Friday he presented his findings to Belize's NGO's and raised the alarm bells on overfishing currently being carried out in Belize's waters.**

Actually, There aren't More Fi...

**And what's Pauly's advice to G.O.B.?**

**Well it's threefold, don't invite Taiwanese trawlers as they stand to destroy fish habitats and threaten tourism.**

**The Professor also believes that Belize should transition to larger required sizes for first captures and offer incentives to fishers who fish in a more sustainable manner.**
