

## Specifications

<p><b>SHADES</b></p>	<p>Cloudform Beams are acoustical fixtures made from fiberglass and finished on all edges and surfaces. Cloudform Beams are made with 53% recycled content fiberglass housing over a metal chassis. Cloudform Beams are available with multiple standard color options and wood-look visuals for the finished Beams.</p>	<p><b>ELECTRICAL</b></p>	<p>Emergency Battery—Emergency output: 10 watts for 90 minutes. Maximum Mounting height: 22ft. Compatible with Signify Bodine sinusoidal output emergency lighting inverters. Signify Bodine Inverters allow designated lighting fixtures to serve as code compliant emergency lighting sources during failure of normal AC power. For additional information see link: <a href="http://www.bodine.com/products/inverter.html">http://www.bodine.com/products/inverter.html</a></p>
<p><b>DESIGN CONSIDERATION</b></p>	<p>Cloudform Beams are available in rectangular shape, note that Beams require a minimum of 2" gap between ends of Beams for best visual due to potential bowing up to 1/8".</p>	<p><b>DRIVERS</b></p>	<p>120-277V constant current, dimming driver standard. Can be wired dimming or non-dimming. 0-10V dimming input with a range of 1%-100%. Dim-to-Off standard. Driver can be accessed from the fixture. Power factor of &gt;.95. Total Harmonic Distortion (THD) of &lt;20%.</p>
<p><b>LUMEN MAINTAINANCE</b></p>	<p>Reported TM-21 Lifetimes L90: &gt;52,600 hours L80: &gt;102,000 hours L70: &gt;102,000 hours</p>	<p>SPECIFICATION CONTINUED ON NEXT PAGE</p>	
<p><b>DIFFUSION</b></p>	<p>Indirect Lighting: Diffuser with split diffusion optics creating a batwing optical distribution. Provides uniform distribution of light with a reduction in center beam intensity. Direct Lighting: Micro-structure diffusion materials providing glare control and even illumination.</p>		
<p><b>LIGHTING</b></p>	<p>Integrated LED light source offering high lumen output and efficacy. Color consistency of 3 SDCM. See additional information summarizing lumen distribution, wattage, and efficacy on following pages.</p>		

SPECIFICATION CONTINUED

<b>CERTIFICATION</b>	Luminaire is CSA listed conforming to UL Standard 1598 in the US and CAN/CSA C22.2 No.250.0 in Canada. In accordance with NEC Code 410.73 (G), this luminaire contains an internal driver disconnect. All electronic components are RoHS compliant, and the mechanical components of the luminaire have been verified to meet RoHS Directive 2002/95/EC UL listed.
<b>STORAGE AND HANDLING</b>	Cloudform Beams must be stored in a dry interior location and must remain in their original cartons prior to installation to avoid damage. The cartons must be stored in a flat, horizontal position. Proper care should be taken when handling Beams to avoid damage and soiling. White cotton or latex gloves are recommended for handling. It is recommended that two installers handle 94" beams.
<b>TEMPERATURE</b>	Cloudform Beams can be installed where the temperature is between 40°F (4°C) and 120°F (49°C). Beams cannot be used in exterior applications, where standing water is present, or where moisture will come in direct contact with the Beams.
<b>FIRE PERFORMANCE</b>	Cloudform Beam fiberglass has a Class A fire rating. The Beams, as with other architectural features located in the ceiling plane, may obstruct or skew the existing or planned fire sprinkler water distribution pattern, or possibly delay the activation of the fire sprinkler or fire detection system. Designers and installers are advised to consult a fire protection engineer, NFPA 13, and their local codes for guidance on the proper installation techniques where fire detection or suppression systems are present.
<b>WARRANTY</b>	5 year warranty on all standard components.
<b>CLEANING CARE</b>	Dust and loose dirt may be easily removed by brushing or with a vacuum cleaner. Vacuum cleaner brush attachments such as those designed for cleaning upholstery or walls do the best job. Be certain to clean in one direction only. This will prevent rubbing dust into the surface of the Beams. Use a melanine eraser sponge to wipe off any dirt or greasy fingerprints. For minor surface and edge scuffing, or scratches on colored panels, use matching Sherwin-Williams® paint that can be purchased from your local Sherwin-Williams® store.

## LIGHT DISTRIBUTION OPTIONS

Consult factory or [lightart.com](http://lightart.com) for IES files, tested in accordance with IESNA LM79

## PERFORMANCE – DIRECT LUMINAIRE

Based on 3500K / 90CRI / Standard Distribution

NOMINAL LUMEN OUTPUT (LM/FT)	INPUT POWER (W/FT)	EFFICACY (LM/W)
350	2.8	123
450	3.7	121
550	4.6	119
650	5.5	118
750	6.4	117
850	7.3	116
950	8.3	115
1050	9.2	114

## PERFORMANCE – INDIRECT LUMINAIRE

Based on 3500K / 90CRI / Standard Distribution

NOMINAL LUMEN OUTPUT (LM/FT)	INPUT POWER (W/FT)	EFFICACY (LM/W)
350	2.7	129
450	3.6	126
550	4.4	124
650	5.3	123
750	6.1	122
850	7.0	121
950	7.9	120
1050	8.8	120

## LIGHT DISTRIBUTION

Based on measurement data

COLOR TEMPERATURE/CRI	MULTIPLIER
2700K / 80	0.98
2700K / 90	0.93
3000K / 80	1.02
3000K / 90	0.97
3500K / 80	1.00
3500K / 90	1.00
4000K / 80	1.08
4000K / 90	1.03

## OUTPUT MULTIPLIERS INSTRUCTIONS

Adjusted Value =  $L_1 \times C_m$  where:

$$L_1 = (\text{Lumen output at 3500K / 90 CRI}) \times$$

$$C_m = (\text{Color Temp. / CRI Multiplier}) \times$$

Example:

$$850\text{LM} / 3000\text{K} / 80\text{CRI}$$

$$(850) \times (1.02) = 789\text{LM}$$
