

Acoustic Collection

LightArt

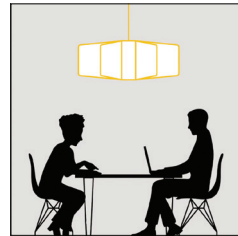

About Acoustics

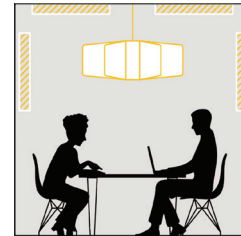

The Acoustic Collection integrates sound absorption and the latest LED technology to create an effective acoustic lighting solution.

These products are made exclusively with 3form Sola Felt material. Composed of 50% post-consumer recycled content, Sola Felt is LBC Red List Free Declare Label product, eligible for LEED, Living Building Challenge, and other green certification credits.

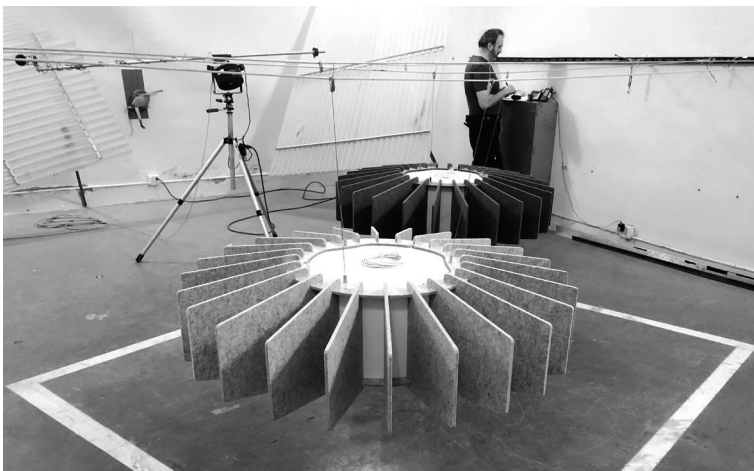

Merging acoustics with lighting allows ceiling and wall surfaces to remain visible and free of clunky traditional acoustic treatment, and the introduction of large-scale acoustic fixtures offers a solution to problematic public spaces. From airports to classrooms—and everything between—LightArt's Acoustic Collection offers a well-designed and efficient lighting and acoustic solution to any environment.

LIGHT

ACOUSTIC

LightArt's research and development team collaborated with acoustics expert Zackery Belanger in a pivotal partnership for the Acoustic Collection.

The ongoing effort includes laboratory and field measurements to yield a deep understanding of the performance of the Acoustic Collection as effective acoustic and lighting solutions.

We offer free acoustic consultations with Zackery for clients looking to leverage the capabilities of this collection and reduce the sound reverberation of their space.

Static

0.75 – 1.0 NRC

Our original sound-absorbing linear fixture provides lighting with acoustical performance. Also available as an unlit baffle.

DIMENSIONS Lengths in 12" increments; height available in 5.6", 11.6", 15.6"

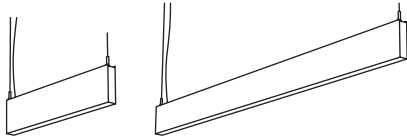

3.8 W C 15.6 H
36.9 – 97.4 L

Stratta, Baffle

0.75 – 1.0 NRC

Stratta are linear fixtures with a slim, simple construction and can be connected in multiple length runs. Baffles share the same profile without lighting for a cost-friendly solution.

DIMENSIONS Lengths in 12" increments; height available in 6", 12", 16"; width in 2", 4" for Baffle only

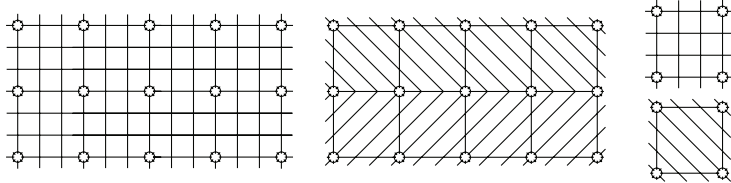

2 W C 12 H
38 – 98 L

Trellis

1.0 NRC

Modular solution made from repeating fins in grid patterns, providing visual depth and full access to the ceiling.

CONFIGURATIONS Modular grids in 48"W x 48"L x 14"H sections

FRAME & WAVE

CHEVRON

Wing

1.3 NRC

Composed of two felt-wrapped wings affixed to a sealed beam fixture, Wing is designed to target noise levels above desks, conference tables, and other workstations.

DIMENSIONS

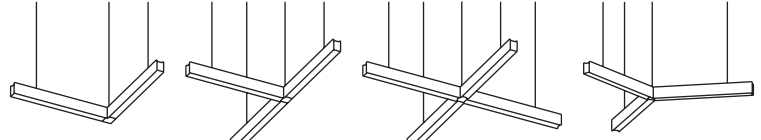

96 L C 48 W C 5 H

Static Links

0.75 – 1.0 NRC

Create, expand, and build the perfect configuration for your project with the first in modular acoustic lighting systems. The four shapes can also be installed as standalone fixtures.

SHAPES Leg lengths from 36" to 96" in 12" increments; height available in 5.6", 11.6", 15.6"

Y

Echo, Echo One

1.15 – 1.30 NRC

Constructed of repeating Sola Felt fins, Echo can be installed as individual pendants or with spanners to create a modular grid. Echo One are standalone pendants.

STYLES 3 styles, 8 & 12 fin configurations, 35" & 47" diameters; 24 fin, 51" & 61" diameters for Echo One

STYLE A
8 FIN 35 DIA

STYLE B
8 FIN 35 DIA

STYLE C
8 FIN 35 DIA

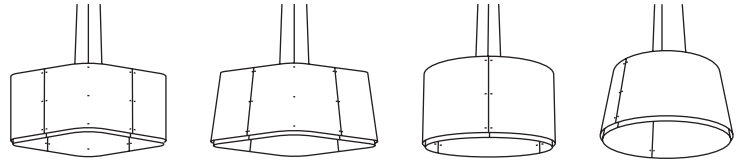

ECHO ONE STYLE B
24 FIN 63 DIA

Shades

0.9 NRC

Classic shapes with an acoustic twist, these shades feature a double layer of Sola Felt to optimize their acoustic performance and allow for a multitude of color combinations.

SHAPES Available in 5 sizes, 17"–42" squares/diameters, 10"–23" heights

CUBE

TRAPEZOID

CYLINDER

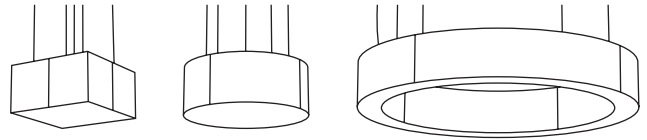

EMPIRE

Box, Drum, Ring

0.85 – 1.0 NRC

Simple shapes with expansive size options capable of providing acoustic performance for a variety of spaces, from airports to classrooms.

DIMENSIONS Varied square/diameter increments, heights in 12" increments

22 – 48 SQ
12 – 48 H

30 – 44 DIA
12 – 48 H
