A Name You Can Trust

Marks Lumber is your choice for quality specialty forest products including timbers, rough-sawn boards, circle-sawn flooring, and natural wood siding products. We are one of the few sawmills left in Montana that manufactures authentic circle sawn products. Owner/Operator Steve Marks and his wife Laura are proud to carry on over 75 years of Marks family tradition, providing lumber products from Clancy, Montana. Working from the beautiful Marks Ranch, the Marks Lumber team is committed to providing top quality lumber products in a sustainable fashion. This friendly, customer-focused team has the experience and expertise to make your project successful.

Marks Lumber Circle-Sawn Flooring

If you're looking for wood floors that are sure to be the star of the show, Marks Lumber's circle sawn flooring is the perfect choice for you. Made in Montana and grown in Montana, our circle sawn flooring is milled to perfection, kiln dried and hand graded to ensure only the highest quality planks are sold.

Our circle sawn flooring is made from Douglas fir, one of the strongest softwoods available. This makes it an extremely durable and long-lasting wood flooring option. The authentic circle saw marks also help hide the dings and scratches that inevitably come with everyday wear-and-tear.

Moisture Content: Kiln dried to 12%

Profile: End-Matched Tongue and Groove;
Relief Marks

Benefits of Marks Lumber Circle-Sawn Flooring

Quality products

Circle sawn wood products from Marks Lumber are produced using consistent manufacturing techniques. Our circle sawn flooring is made on a unique circle saw head rig using high-quality, carefully selected Douglas fir logs. At Marks Lumber, we aim to produce architecturally sound, sustainable lumber for the discerning home builder.

Installing circle-sawn flooring can be strenuous and time-consuming, especially if you have to trim each piece at the construction site. With Marks Lumber's flooring, all boards are properly end-matched using an optimizing trim saw, making for a seamless installation process.

Durability

At Marks Lumber, creating sustainable products is our specialty. A quality flooring product should be able to serve you for years to come, providing a great value and peace of mind.

Our circle-sawn flooring does just that.

Marks Lumber sources its high-quality circle sawn flooring from Montana-grown Douglas fir. While Douglas fir is still a relatively soft wood, it has sufficient density to provide an extremely durable living surface when installed with a quality floor finish.

The actual thickness of our circle sawn flooring is 13/16 inch, making it perfect for high traffic areas. It also gives you the ability to refinish your floors when the everyday wear-and-tear starts to take its toll on the overall appearance.

Great looking, Flexible Colors

Douglas fir presents a natural warm appearance with beautiful yellows and reds, bringing a warm and comfortable feeling to your home. All Marks Lumber flooring comes unfinished, giving you the flexibility to choose the stain color that best suites your personal style. Leave it natural or mix it up – the possibilities are endless!

Estimating and Purchasing Material

Proper estimation is critical to minimizing project costs. If you are currently building and have the plans, send them to us. The Marks Lumber sales staff is happy to help you calculate the amount of flooring you'll require for your project.

If you plan to measure yourself, figure the square footage as close as possible. Marks suggests that you buy around 5% over your estimated need to avoid running short when it comes time to install.
