

4.3" Newhaven Resistive LCD Touchscreen Product datasheet

DSP003

USD39.00

A 4.3-inch resistive LCD touchscreen from Newhaven Display International, with the following features:

- 480 x 272 pixel resolution.
- 6:00 optimum viewing angle.
- 3.3V LCD.
- 24-bit Parallel RGB Interface.
- White LED Backlight.
- Wide Temperature (-20C to +70C).
- 4-wire Resistive Touch Panel.
- RoHS.

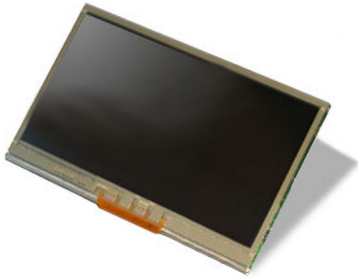

TFT LCD Displays are perfect displays for providing a rich user interface for all types of products. While typically used in consumer devices like personal DVD players and handheld devices, TFTs are also well suited for industrial applications.

Compatibility:

This screen is compatible with Geppetto-built expansion boards, single board computers (such as Pepper 43R) and custom built boards _only_.
