

Newhaven 5.0" Capacitive LCD Multi-Touch Screen Product datasheet

DSP007

USD99.00

The 5.0-inch capacitive LCD multi-touch screen from Newhaven Display International has the following features:

- 800 x 480 pixel resolution
- 12:00 optimum viewing angle
- 3.3V LCD
- 24-bit Parallel RGB Interface
- White LED Backlight, Transmissive
- Wide Temperature (-20C to +70C)
- Capacitive Touch Panel with Controller
- RoHS compliant

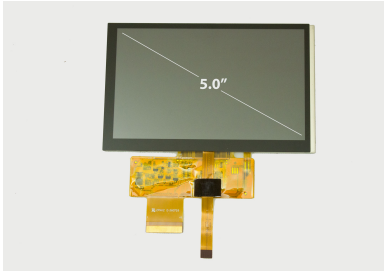

TFT LCD Displays are perfect displays for providing a rich user interface for all types of products. While typically used in consumer devices like personal DVD players and handheld devices, TFTs are also well suited for industrial applications.

Compatibility

This screen is compatible with GEPPETTO-BUILT EXPANSION BOARDS (such as Arbor 50C), single board computers, and custom built boards .only..
