The GUMSTIX RASPBERRY PI CM4 UPREV board allows the Raspberry Pi CM4 COM to be used on existing CM3 boards. The CM4's GPIOs, communications signals, and power pins are re-routed onto a SODIMM edge connection to match the pin-out of the CM3.

FEATURES INCLUDE:

- Raspberry Pi CM3-compatible SODIMM edge connection
- Power indicator LED

**Mating connector**

- 2 x Stacking Board Connector, DF40 Series, Receptacle, 0.4 mm, 100, Surface Mount

**What's included**

- 1 x Raspberry Pi CM4 to CM3
