Thermoplastic Rubber (TPR) 1-1/2", 2" Diameter Wheels

Single Ball Bearing Raceway • Nickel Finish
Self Lubricating Bearings • Gray Thermoplastic Rubber

High performance wheel offers the advantage of both hard and soft tread materials in a single wheel. Like a hard tread wheel, TPR rolls easily and is very durable. Like soft tread wheel, it rolls quietly, protects floors and resists impacts with a cushion ride. Non-marking wheel resists chemicals, water, steam, metal shavings and other floor debris. Features maximum weatherability.

Temperature Range: -5° F to 140° F

Hardness: 95(±5) Durometer Shore A Scale

C100/C500 General Duty Plate Casters

Soft Rubber • Hard Rubber • Polypropylene 2", 2-1/2", 3" & 4" Diameter Wheels

Ideal for general use in factories, warehouses, stores, hotels, schools, offices, etc.

Such applications may include furniture dollies, display racks, tool boxes, equipment carts, etc.

Available in 3 Wheel Styles:

SOFT RUBBER - This composition rubber wheel combines a soft rubber tread with a hard rubber core for quiet movement, a cushioned ride, and maximum floor protection. Temperature operating range is -40°F to +180°F. Hardness is 75A.

HARD RUBBER - A hard rubber molded composition throughout. It is impervious to oils, greases and gasoline. It offers many desirable characteristics; high load rating, good mobility, high impact resistance, and good floor protection. Temperature operating range is -40°F to +180°F. Hardness is 75A.

POLYPROPYLENE - This polypropylene wheel is light in weight, low in cost and high in impact strength. It resists water and chemical absorption and even stands up to repeated steam cleaning non-marking tread provides excellent floor protection. Temperature operating range is -20°F to +180°F. Hardness is 60D.

Gray Dyna - Tread TPR Casters

3", 4" & 5" Diameter Wheels

Ideal For Tool Boxes, Bakery Racks, Dollies, Stock Trucks And Other Institutional Uses Requiring Good Mobility.

- **Dyna-Tread TPR Wheels:** Gray thermoplastic rubber. Can resist most chemicals, caustics, oils & acids. Rugged polypropylene hub won't dent, mar, fade or stain. Tread and hub are double bonded and mechanically interlocked to eliminate thread separation. Give dollies, carts, and trucks a soft and cushioned non-marking ride. Temperature operating range in -40°F to +180°F.
- **Two independent rows** of hardened and polished ball bearings raceways.
- **Thread Guard Hub:** Thread guards can help protect wheel bearings from buildup of material such as threads that can cause binding. Thread guards promote longer life and lower maintenance of casters & wheels.
- **Self lubricated bearings**
- **Corrosion resistant zinc finish**
- **Nut & Bolt wheel attachment**
