1. The panel has developed different ways to address intergovernmental challenges.
   a. The project asked fellows for examples of intergovernmental partnerships that worked well.
3. The panel discussed the many projects going on.
   a. Lou Uccellini talked about some of the projects he has worked on.
      i. The main takeaways were that many important decisions are made at the local level.
      ii. People have only recently started to visualize the impact of Climate Change.
   b. Dan Guttman and the international panel are learning from other countries and discussing what contributions they can bring.
   c. The Homelessness Working Group led by Rich Callahan and Steve Redburn is finding instances of success in homelessness policy.
4. Rich Callahan led a discussion with the Fellows.
   a. The cities and counties will share a lot of the burden in adapting to Climate Change as opposed to the Federal Government.
   b. Chris Koliba - Climate and Technological disruptions are percolating through our systems. How will we be able to identify interventions that have multiple co-benefits?
   c. John Kimensky - Collaborative governance has two processes, one being collaborating around a specific initiative, and the other one being a long-term ongoing process. Are there examples of sustainability that have survived several generations of leaders?
   d. The transportation system in America sets an expectation that includes sustained intergovernmental collaboration in transportation investment. This same expectation can apply to multiple policy areas.
   e. Gary Vanlandingham - What are the government implications for these long-term issues such as Climate Change? It will require deep structural change in how the
intergovernmental system operates to tackle these issues.

### Next Steps
