Attachment 3

Focus Areas to Consider to
Improve Intergovernmental Arrangements
to Improve Outcomes in Equitable, Fair Ways
October 28, 2022 draft

<u>Data handling</u>
- what data are needed by different participants in the system
- who collects what, how and when
- what data gets shared and with whom and what does not
- what analyses get done and how those analyses get shared
- how data and analyses get used (e.g., to inform where to focus and find ways to improve and/or to reward and punish).

<u>Community and Communications</u>
- **<u>Community</u>**: building trust by building and supporting (creating where needed) continuous learning and improvement networks for:
  - o Continuous learning and improvement
  - o Collaboration for discovery, continuous learning and improvement, priority setting
  - o Impact decision support services
- **<u>Communications</u>**: from whom, to whom, among whom about what, when, how, and how well

<u>Incentives</u> and <u>accountability expectations</u>
- **<u>Incentive structures</u>**: what intergovernmental incentives have worked in the past, what has backfired, how to design future incentives well
- **<u>Accountability expectations</u>**: what does accountability mean, who needs to be accountable for what and to whom to improve outcomes in equitable, fair ways
