

How has COVID-19 Changed the Way the Government Does its Work?

There's no going back as agencies anticipate a future with much greater use of IT to serve the public

SAIC®

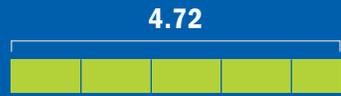

Follow the journey of how we got here and the data driving what's next.

Employees went from most days working in an office building to working at home.

Teleworking Days Per Week

VS.

39% Rarely Teleworked Before COVID-19

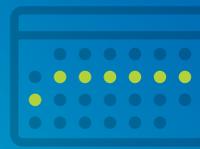

VS.

1% Rarely Telework Now

And Public Health Agencies respondents are working remotely **more than 5 days a week**

The shift from physical to virtual locations did not faze the federal workforce.

Personnel remained committed to the mission

84%
are more or just as productive

Of those, 56% are somewhat and a lot more productive

- 32% somewhat
- 24% a lot more

Critical concerns to address linger.
