2023

SSC created to transform how the GC manages its IT infrastructure

Ongoing replacements and upgrades to mission-critical IT hosting systems and cyber security enhancements

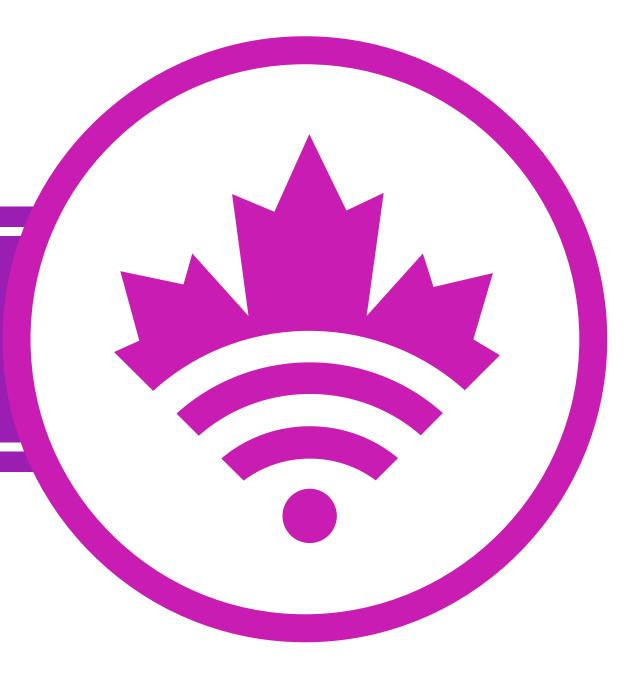

GC released a
Digital Operations
Strategic Plan

SSC 3.0 launched, providing strategic direction for an enterprise delivery model

SSC accelerated the enhancement of enterprise IT solutions and infrastructure to support the GC in COVID-19 response efforts

Canada's Digital
Ambition 2022
released

SSC launches roadmaps for Delivering Digital Solutions Together, providing visibility on the future direction of SSC's key services

2011-2018

Work was focused on

consolidating aging patchwork and maintaining newly designed IT infrastructure.

## Cybersecurity

was made a major pillar in our mandate.

Aimed to **eliminate** duplicated platforms and

incompatible systems.

Closed over **132** small and medium sized legacy data centres.

## 2019-2022

Focused on a delivery model that served the common needs of government at speed and scale:

- Established secure cloud to ground connectivity for
   18 partners.
- Fully enabled
   Microsoft 365
   for 39 partners.
- Closed over 252 small and medium sized legacy
   data centres.
- Supported Statistics Canada in the first ever digital census.

## 2023-future

Building on SSC 3.0, we're continuing our progress in 4 key areas of connectivity, cybersecurity, hosting and digital services.

This will guide our service delivery, outline our key steps and provide predictability and clarity about the future.
